They came from the poorest cities on Earth. They were promised free food and housing. They didn't know that they, or their children, would never see Earth again. A few years ago, a military doctor walking the corridors of New Jakarta Station saved Melati's life. She signed up for the International Space Force to pay back her moral debt to him. But her family thinks she has betrayed her people. It was ISF who forcefully removed their grandmothers and grandfathers from the crowded slums of Jakarta to work in interstellar space stations. It is Melati's job to

teach six-year old construct soldiers, artificial humans grown in labs and activated with programmed minds. Her latest cohort has one student who claims that he is not a little boy, but a mindbase traveller whose swap partner took off with his body. It soon becomes clear that a lot of people are scouring the station for this fugitive, a scientist with dangerous knowledge. The best place to hide in the station is amongst the many cultures and subcultures of the expat Indonesian B-sector. Looking for him brings Melati into direct conflict with her people. She does not want to be seen as one of the enemy, but if the scientist's knowledge falls in the wrong hands, war will come to the station. Will appeal to readers of C.J. Cherryh's science fiction, Elizabeth Moon and Sean Williams. Science fiction, hard SF, hard science fiction, AIs, clones, space station, war, space, artificial minds, scifi, sci fi, military Reprint of the original, first published in 1867. The Avro Lancaster was the RAF's most famous and successful heavy bomber of the Second World War. Used predominantly at night, 'Lancs' dropped 608,612 tons of bombs in 156,000 sorties in the period 1942-1945. Some of these missions were incredibly daring - notably the 'dambusters' raid of 617 squadron on the Ruhr valley dams in May 1943. The success of such operations was testament both to the rugged, reliable qualities of this amazing aircraft and the bravery and skill of the pilots, navigators, bombardiers, flight engineers and gunners that crewed it. They relied on their training and experience, supplemented by various pamphlets and manuals that were produced throughout the war. Supplemented with illustrative plans and diagrams, this fascinating pocket manual provides a unique insight into the wartime operation of this famous aircraft. Who am I and where do I come to write this book? I feel it necessary to address all aspects of motherhood, so I decided to include both the sweetness and delight plus the shadow side of motherhood in this book. Some challenging life situations occur that are vital for us to consider, so I am including some disquieting statistics. Because many women (and men) have refrained from checking within themselves or making an examination on emotional, mental, physical and spiritual planes about having children, hardships have been created, both personally and planetary.
