*This title is a practical guide on how to apply 21st century principles in the pharmaceutical and biotechnology workplace and include simple understandable examples and case studies on modern compliance. This book is for directors, consultants, practitioners, and professionals aspiring to effectively manage operations, but is targeted at applying innovation to the management of operations, including supply chains. It is appropriate for those establishing a career in innovation and operations management. This book will: Equip readers with understanding of the nature of innovation, operations management concepts, business models, methods and tools; Explore best practices and most commonly used operations and innovation business*

models, methods, and tools used by successful organisations; Consider particular operational issues directly impact the competitiveness of organisations Collection management is becoming increasingly complex due to electronic access to information, the growth of the Internet, greater reliance on document delivery and resource sharing, and changes in scholarly communication. This professional reference shows how changes in all aspects of collection management will affect future activities in this area and examines the likely value of these changes in the next century. Chapters are written by leading practitioners and academics from around the world, and the volume concludes with a bibliographical essay. Collection management has always been more difficult to define and more varied in organization and procedures than other library operations, such as acquisitions or automation. Current shifts in emphasis only make this more apparent. The electronic access to catalogs, databases, and full text materials, the increasing importance of the Internet, greater reliance on interlibrary loan and document delivery, and the changing world of scholarly communication all influence how library collections are acquired and managed. Faculty research and academic disciplines are not easily contained within clearly defined boundaries, acquisitions on-demand is on the increase, and document delivery has made patrons less dependent on local collections. These changes influence policies, but not in any clear or uniform manner, and sometimes against organizational constraints. If local collections are being emphasized less, and access and connectivity more, then selection, evaluation, and preservation are greatly affected. And while cooperative efforts may relieve a library from collecting exhaustively in all areas, needed materials must still be collected and stored somewhere. This professional reference shows how changes in all aspects of collection management will affect future activities in this area and examines the likely value of these changes in the next century. Chapters are written by leading practitioners and academics from around the world, and the volume concludes with a bibliographical essay. At 668 pages and 26 chapters, *Managing Marketing in the 21st Century* is about understanding how to develop market strategy and manage the marketing process. This is not a book that attempts to describe all there is to know about marketing; rather, the book focuses on what the prospective manager needs to know. Hence, *Managing Marketing in the 21st Century* differs from other senior undergraduate and introductory graduate-level marketing texts. We take a position on what we believe is a better or worse course of action for marketers. Marketing is an applied field, and we believe textbook writers should provide guidance for good marketing practice. In addition, we focus on the manager, not just the marketer. For readers committed to a career in marketing (and we hope there are many), *Managing Marketing in the 21st Century* will form a solid foundation as you study marketing further and deeper. But

the vast majority of you will not work in marketing departments, and will instead become senior executives, general managers, CFOs, and CEOs. We write for you also, because an understanding and appreciation of marketing is central to virtually every important decision that managers make. Because this marketing course will be the only one many of you will take, in a sense, this book provides what every general manager and senior executive must know about marketing. Marketing activity lies at the core of leading and managing a business. Marketing provides the focus for interfacing with customers. Marketing is also the source of insight about the market, customers, competitors, complementors, and the business environment in general. *Managing Marketing in the 21st Century* contains introductory chapter cases, many examples, Internet links to additional material, video/audio interviews, key ideas, marketing questions, and multiple choice and true/false questions and answers. *Corporate Challenge and Sustainability in the 21st Century* introduces the concept of sustainability to the readers and informs them about its importance in the 21st century. It also makes them aware about the corporate culture in the 21st century and relates sustainability to the culture. This book also discusses about challenges in achieving sustainability that arise due to diversity in cultures, the relations between the success of corporate and achievement of sustainability, the connection between business and sustainability and the challenges being posed to the attainment of sustainability. This book gives an idea to the readers about the various aspects related to the sustainability in the corporate sector and the various challenges that lie in its achievement. This third edition updates and adds to the successful second edition and gives the reader a thorough description of PLM, providing them with a full understanding of the theory and the practical skills to implement PLM within their own business environment. This new and expanded edition is fully updated to reflect the many technological and management advances made in PLM since the release of the second edition. Describing the environment in which products are developed, manufactured and supported, before addressing the Five Pillars of PLM: business processes, product data, PLM applications, Organisational Change Management (OCM) and Project Management, this book explains what Product Lifecycle Management is, and why it's needed. The final part of the book addresses the PLM timeline, showing the typical steps and activities of a PLM project or initiative. "Product Lifecycle Management" will broaden the reader's understanding of PLM, nurturing the skills needed to implement PLM successfully and to achieve world-class product performance across the lifecycle. This text brings managers the latest ideas on branding, marketing and strategic change. It includes a step-by-step guide to developing marketing strategies and advice on pricing decisions, advertising and communications plans. This reader offers instant

access to fifty classic and original readings in health policy and management. Compiled by experts, the editors introduce a framework setting out the key policy drivers and policy levers, giving a conceptual framework that provides context for each piece. The book begins with the premise that workforce education is a global issue and is becoming increasingly competitive. It is important for the reader to understand the concept of work historically, as well as its meaning and implications to individuals. Understanding this history leads to better instruction, education, and training, which can solve many human performance problems in the workplace. Workforce Education, Occupational, Training, Instruction or Career Education, Vocational Education or Technical Education is used interchangeably throughout this book. The concept of today's workforce development is universal. As a college professor, I believe I have an ethical obligation to promote learning, to ensure health and safety, to protect the public and private trust, and to promote the transfer of learning. A second premise of this book is that there are common issues and problems in the workplace. This book provides, in a single volume, the knowledge base common to all work settings for today's students, regardless of their specialty. Thus, the book was designed for students to think globally and to understand how to be and what it takes to be competitive in the global economy. The Handbook of 21st Century Management provides authoritative insight into the key issues for students in college or corporate courses with a particular emphasis on the current structure of the topic in the literature, key threads of discussion and research on the topic, and emerging trends. This resource is useful in structuring exciting and meaningful papers and presentations and assists readers in deciding on management areas to take elective coursework in or to orient themselves towards for a career. Indeed, familiarity with many of the topics in this Handbook would be very useful in job interviews for positions in business. Since the turn of the millennium, there has been a burgeoning interest in, and literature of, both landscape studies and food studies. Landscape describes places as relationships and processes. Landscapes create people's identities and guide their actions and their preferences, while at the same time are shaped by the actions and forces of people. Food, as currency, medium, and sustenance, is a fundamental part of those landscape relationships. This volume brings together over fifty contributors from around the world in forty profoundly interdisciplinary chapters. Chapter authors represent an astonishing range of disciplines, from agronomy, anthropology, archaeology, conservation, countryside management, cultural studies, ecology, ethics, geography, heritage studies, landscape architecture, landscape management and planning, literature, urban design and architecture. Both food studies and landscape studies defy comprehension from the perspective of a single discipline, and thus

such a range is both necessary and enriching. The Routledge Handbook of Landscape and Food is intended as a first port of call for scholars and researchers seeking to undertake new work at the many intersections of landscape and food. Each chapter provides an authoritative overview, a broad range of pertinent readings and references, and seeks to identify areas where new research is needed—though these may also be identified in the many fertile areas in which subjects and chapters overlap within the book. Winning in the 21st Century: Business Principles & Processes That Really Work provides the reader with key principles and processes, best practices, and personal experiences on how to operate a business to achieve consistent success. I have often said that if I had known what I know now in my first corporate President's role, I could have done so much more to drive that business to even greater success. This book provides the reader (CEO's, Presidents, Business Owners, Entrepreneurs, and those aspiring to these positions) with real-life examples and straight to the point principles, processes, and best practices that made all the difference in the world for me in my 15-year career operating winning businesses. Most business books that I have read tell the reader what to do. My book not only tells the reader what to do, but also explains how to do it with text and illustrations. My LinkedIn profile can be found with this link, [linkedin.com/in/wmartin15](https://www.linkedin.com/in/wmartin15). My website is [15consulting.com](http://15consulting.com). In this digital age, information is pivotal to organizations. This book aims to raise awareness of the need to radically change management styles to fit with the new patterns of working in the 21st century. Each chapter provides ideas and discussion around a particular subject area and closes with an assessment of the skills that are required by managers in order to manage situations in a creative and dynamic way. Case studies are also used to enable the reader to consider different ways in which management skills can be applied to business situations. "I was immediately drawn to MyEducationLab because it was so easy to use."--- Stephanie Hurley, Student "My favorite part of MyEducationLab is that it helps me become a teacher."--- Rebecca Sullivan, Student

**EBOOK: Managing Organizations Text Reading & Cases** The challenge of managing projects is to combine the technology of the future with lessons from the past. In the Third Edition of Project Management for the 21st Century, noted authors Bennet Lientz and Kathryn Rea provide a modern, proven approach to project management. Properly applied without massive administrative overhead, project management can supply structure, focus, and control to drive work to success. Third Edition revisions include: 35% new material; three new chapters on risk management, international and multinational projects, project culture; entire text rewritten to take advantage of the Web and Internet tools; new appendix covering web sites; additional materials on "what to do next"; more feedback from readers and lessons learned. As the 21st

century begins, we are faced with opportunities and challenges of available technology as well as pressured to create strategic and tactical plans for future technology. Worldwide, IT professionals are sharing and trading concepts and ideas for effective IT management, and this co-operation is what leads to solid IT management practices. This volume is a collection of papers that present IT management perspectives from professionals around the world. The papers seek to offer new ideas, refine old ones, and pose interesting scenarios to help the reader develop company-sensitive management strategies.

*21st Century Homestead: Agroecology* contains everything you need to stay up to date on organic agroecology. The world is undergoing major transitions due to three driving forces—population changes, climate changes, and energy resource constraints—making it essential for us to move toward sustainability in the implementation of projects and programs as well as our everyday life. Real sustainability exists where there is a balance between population and energy usage and a stable climate—global equilibrium. Designed for program and portfolio managers and senior planners, *Sustainable Program Management* provides essential information on the three major driving forces of the coming decades and presents options to assist us in moving toward a sustainable future. This book offers a unique approach to accommodating the three new constraints of population change, climate change, and energy resources as impacts on programs and portfolios. It presents them in the form of overlays, which facilitate planning by considering the effects of these additional constraints on a program, along with schedule, budget, and performance constraints. The overlays summarize the book's extensive analyses of these global challenges. The book is divided into sections on population change, climate change, and energy resource constraints and provides background information and overlays for each one. The author discusses scenarios, possible solutions, and probable outcomes, which provide the basis for evaluating the risks and the sustainability considerations involved. The final section of the text addresses planning for real sustainability and describes six pathways toward a sustainable system. This practical book familiarizes readers with these new global challenges to program management and provides a basis for developing sustainable and successful programs.

The International PROLAMAT Conference is an internationally well known event for demonstrating and evaluating activities and progress in the field of discrete manufacturing. Sponsored by the International Federation for Information Processing (IFIP), the PROLAMAT is traditionally held every three years and it includes the whole area of advanced software technology for Design and Manufacturing in Discrete Manufacturing. Past editions of the International PROLAMAT Conference have explored: -Manufacturing Technology, -Advances in CAD/CAM, -Software for Discrete Manufacturing, -Software for Manufacturing. The Eight

International PROLAMAT held in 1992 (Tokyo), focused on the theme of Man in CIM. The 1995 PROLAMAT (Berlin), featured the theme of Life Cycle Modelling for Innovative Products and Processes. This past emphasis on human aspects and innovation provides a strong foundation for the next PROLAMAT. Under the title: The globalization of manufacturing in the digital communications era of the 21st century: innovation, agility and the virtual enterprise, the 1998 conference expands the PROLAMAT scope to include teams and virtual enterprises which come together across space and time to develop new products and bring them to global markets. Manufacturing issues and information models have long been part of concurrent engineering; they are increasingly important in new product innovation and in the development of manufacturing plans and processes which span multiple companies along with multiple time zones. This book *Business Communication: Essential Strategies for Twenty-first Century Managers* brings together application-based knowledge and necessary workforce competencies in the field of communication. The second edition utilizes well-researched content and application-based pedagogical tools to present to the readers a thorough analysis on how communication skills can become a strategic asset to build a successful managerial career. With the second edition, Teaching Resource Material in the form of a Companion Website is also being provided. This book must be read by students of MBA, practicing managers, executives, corporate trainers and professors.

**KEY FEATURES**

- **Learning Objectives:** They appear at the beginning of each chapter and enumerate the topics/concepts that the readers would gain an insight into after reading the chapter
- **Marginalia:** These are spread across the body of each chapter to clarify and highlight the key points
- **Case Study 1:** It sets the stage for the areas to be discussed in the concerned chapter
- **Case Study 2:** It presents real-world scenarios and challenges to help students learn through the case analysis method
- **Tech World:** It throws light on the latest advancements in communication technology and how real-time business houses are leveraging them to stay ahead of their competitors
- **Communication Snippet:** It talks about real organizations/people at workplaces, their on-job communication challenges and their use of multiple communication channels to gain a competitive edge
- **Summary:** It helps recapitulate the different topics discussed in the chapter
- **Review and Discussion Questions:** These help readers assess their understanding of the different topics discussed in the chapter
- **Applying Ethics:** These deal with situation-based ethical dilemmas faced by real managers in their professional lives
- **Simulation-based Exercise:** It is a roleplay management game that helps readers simulate real managers or workplace situations, and thereby enables students to apply the theoretical concepts
- **Experiential Learning:** It provides two caselets, each followed by an Individual Activity and a Team

Activity, based on real-time business processes that help readers 'feel' or 'experience' the concepts and theories they learn in the concerned chapter to gain hands-on experience • References: These are given at the end of each chapter for the concepts and theories discussed in the chapter An ideal resource for students and professionals, this comprehensive reader offers a diverse collection of the foremost writings on leadership and management in the public and nonprofit sectors. The book includes previously published essays, articles and extracts from leading books and periodicals, framed and vetted by author and professor James L. Perry. The anthology covers a wide range of topics, offering a third sector perspective on the general leadership questions essential to any manager--principles and practices of leadership, organizational change, corporate culture, communication, efficiency, ethics--as well as issues unique to public and nonprofit organizations--understanding leadership roles in the nonprofit world, founder vs. ED relationships, board leadership, alternative and collaborative leadership, strategic management, sustainability, and the future of leadership. Praise for The Jossey-Bass Reader on Nonprofit and Public Leadership: "The Jossey-Bass Reader on Nonprofit and Public Leadership is the most comprehensive collection of essays on leadership available. It should be required reading for all of those who teach, practice and are students of the art and science of leadership." ?Stephen E. Condrey, University of Georgia "This collection of short and readable pieces will be very valuable for students and practitioners of public and nonprofit leadership." ?Michael O'Neill, professor of nonprofit management, School of Business and Professional Studies, University of San Francisco "James Perry has provided a very valuable tool for nonprofit and public sector leaders. This collection represents the very best lessons for leaders, from John Gardner to Kouzes and Posner. The clear structuring and framing of the articles makes this a perfect handbook for nonprofit and public sector leaders of all types." ?Ronald E. Riggio, Henry R. Kravis Professor of Leadership and Organizational Psychology Director, Kravis Leadership Institute, Claremont McKenna College "Jim Perry brings together in a single volume much of the best writing on leadership theory and leadership 'doing.' For anyone interested in the attributes and practice of leadership, this is the book, looking back at what's been proven effective and forward to what's needed in the next generation of leaders." ?Timothy L. Seiler, director, The Fund Raising School, The Center on Philanthropy at Indiana University, Indianapolis, Indiana This book constitutes the proceedings of the 21st International Conference on Computer Information Systems and Industrial Management Applications, CISIM 2022, held in Barranquilla, Colombia, in July 2022. The 28 papers presented together with 3 keynotes were carefully reviewed and selected from 68 submissions. The main topics covered by the chapters

in this book are biometrics, security systems, multimedia, classification and clustering, and industrial management as well as interesting papers on computer information systems as applied to wireless networks, computer graphics, and intelligent systems. This book explores the ways in which the broad range of technologies that make up the smart city infrastructure can be harnessed to incorporate more playfulness into the day-to-day activities that take place within smart cities, making them not only more efficient but also more enjoyable for the people who live and work within their confines. The book addresses various topics that will be of interest to playable cities stakeholders, including the human-computer interaction and game designer communities, computer scientists researching sensor and actuator technology in public spaces, urban designers, and (hopefully) urban policymakers. This is a follow-up to another book on Playable Cities edited by Anton Nijholt and published in 2017 in the same book series, Gaming Media and Social Effects.

Product Lifecycle Management (2nd edition) explains what Product Lifecycle Management (PLM) is, and why it's needed. It describes the environment in which products are developed, realised and supported, before looking at the basic components of PLM, such as the product, processes, applications, and people. The final part addresses the implementation of PLM, showing the steps of a project or initiative, and typical activities. This new and expanded edition of Product Lifecycle Management is fully updated to reflect the many advances made in PLM since the release of the first edition. It includes descriptions of PLM technologies and examples of implementation projects in industry. Product Lifecycle Management will broaden the reader's understanding of PLM, nurturing the skills needed to implement PLM successfully and to achieve world-class product performance across the lifecycle. "A 20-year veteran of PLM, I highly recommend this book. A clear and complete overview of PLM from definition to implementation. Everything is there - reasons, resources, strategy, implementation and PLM project management." Achim Heilmann, Manager, Global Technical Publications, Varian Medical Systems "Product Lifecycle Management is an important technology for European industry. This state-of-the art book is a reference for those implementing and researching PLM." Dr. Erastos Filos, Head of Sector "Intelligent Manufacturing Systems", European Commission "This book, written by one of the best experts in this field, is an ideal complement for PLM courses at Bachelor and Master level, as well as a well-founded reference book for practitioners." Prof. Dr.-Ing. Dr. h.c. Sandor Vajna, University of Magdeburg, Germany "This comprehensive book can help drive an understanding of PLM at all levels - from CEOs to CIOs, and from professors to students - that will help this important industry continue to expand and thrive." James Heppelmann, President and Chief Executive Officer, PTC "PLM is a mission-critical decision-making system leveraged by the world's most

innovative companies to transform their process of innovation on a continuous basis. That is a powerful value proposition in a world where the challenge is to get better products to the market faster than ever before. That is the power of PLM." Tony Affuso, Chairman and CEO, Siemens PLM Software Creative Management of Small Public Libraries in the 21st Century is an anthology on small public libraries as centers of communities serving populations under 25,000 that make up most of the public library systems in the United States. A wide selection of topics was sought from contributors with varied backgrounds reflecting the diversity of small public libraries. The thirty-two chapters are arranged: Staff; Programming; Management; Technology; Networking; Fundraising; User Services and provide tools to lead a local public library with relevant and successful services. This volume shares a common sense approach to providing a small (in staff size or budget) but mighty (in impact and outcome) public library service. The contributors demonstrate that by turning the service delivery team outward to the community with enthusiasm and positive energy, it is possible to achieve significant results. Many chapters summarize best practices that can serve as checklists for the novice library director or as a review for the more seasoned manager working through new responsibilities. Chapters are tactical, focusing on specific issues for managers such as performance evaluations, effective programming, or e-reader services. Time management is crucial in a small or rural public library as well as the challenges associated with managing Friends and volunteers. While most public libraries do not have the resources to satisfy customer expectations for instant gratification, ultra-convenience and state-of-the-art technologies, The authors of this book details strategies and methods for providing top-notch customer service while moving beyond customer service to the creation of meaningful customer relationships. This volume makes an important contribution to the literature by reminding us that public libraries transform communities of every size. In fact, never before has the role of the public library been a more critical thread in the fabric of community life. Doves of people have turned to local food as a way to retreat from our broken industrial food system. From rural outposts to city streets, they are sowing, growing, selling, and eating food produced close to home—and they are crying out for agricultural reform. All this has made "local food" into everything from a movement buzzword to the newest darling of food trendsters. But now it's time to take the conversation to the next level. That's exactly what Philip Ackerman-Leist does in Rebuilding the Foodshed, in which he refocuses the local-food lens on the broad issue of rebuilding regional food systems that can replace the destructive aspects of industrial agriculture, meet food demands affordably and sustainably, and be resilient enough to endure potentially rough times ahead. Changing our foodscapes raises a host

of questions. How far away is local? How do you decide the size and geography of a regional foodshed? How do you tackle tough issues that plague food systems large and small—issues like inefficient transportation, high energy demands, and rampant food waste? How do you grow what you need with minimum environmental impact? And how do you create a foodshed that's resilient enough if fuel grows scarce, weather gets more severe, and traditional supply chains are hampered? Showcasing some of the most promising, replicable models for growing, processing, and distributing sustainably grown food, this book points the reader toward the next stages of the food revolution. It also covers the full landscape of the burgeoning local-food movement, from rural to suburban to urban, and from backyard gardens to large-scale food enterprises. Contains essays in which various library scholars examine ethics as they relate to issues of school librarianship, including collection development, library access, confidentiality, use of technology, intellectual freedom and property, administration, and professional relationships. This book presents an earth science-based overview of the challenges to sustainability. It provides a detailed study of climate change, as well as energy, food, and water security across different regions. The author uncovers the problems caused by current social and environmental practices, and offers potential solutions. Focusing on systems theory, footprint analysis, risk, and resilience, many examples are given of how to use resources sustainably, especially common pool resources such as the atmosphere, oceans, and groundwater. The book develops its ideas from an array of practical case studies, centering on communal objectives and shared responsibilities. In the past decade, our rapidly changing world faced terrorism, global epidemics, economic and social strife, new communication technologies, immigration, and climate change to name a few. These fears and tensions reflect an evermore-interconnected global environment where increased mobility of people, technologies, and disease have produced great social, political, and economical uncertainty. The essays in this collection examine how monstrosity has been used to manage these rising fears and tensions. Analyzing popular films and television shows, such as *True Blood*, *Twilight*, *Paranormal Activity*, *District 9*, *Battlestar Galactica*, and *Avatar*, it argues that monstrous narratives of the past decade have become omnipresent specifically because they represent collective social anxieties over resisting and embracing change in the 21st century. The first comprehensive text that uses monstrosity not just as a metaphor for change, but rather a necessary condition through which change is lived and experienced in the 21st century, this approach introduces a different perspective toward the study of monstrosity in culture. Scholars have begun critically assessing the relationship of modern environmental science, including the study of ecology, to the creation and study of art and culture. In this volume, the voices come from

around the globe—some tentative in the stirring of conscious entwinement, other voices, strident and forthright, foresee a grim future, for the planet, for our humanity, as our impositions and consumptions have made monsters of us all and stripped us of our essence, the heart of what it is to be human. An essential introductory textbook that provides a comprehensive and student-friendly overview of the key processes involved in developing and managing a theatre in the 21st century. It covers a complete range of topics fundamental to successful commercial and not-for-profit theatre management, from developing a mission statement to communicating with stakeholders, from marketing and promotion to fund development platforms, and from governance structures to community engagement. With over two decades of experience in the industry, Anthony Rhine encourages a critical understanding of theatre management; rather than simply giving students the facts and theories to memorise, he shows readers how to think like theatre managers, giving them the skills needed to be able to carve out their own career paths. Far-reaching and globally applicable, the text serves as an invaluable guide for aspiring theatre managers, as well as undergraduate and postgraduate students on theatre management, arts management, creative industries and theatre and performance studies degree courses. Contemporary Studies in Environmental and Indigenous Pedagogies: A Curricula of Stories and Place. Our book is a compilation of the work of experienced educational researchers and practitioners, all of whom currently work in educational settings across North America. Contributors bring to this discussion, an enriched view of diverse ecological perspectives regarding when and how contemporary environmental and Indigenous curriculum figures into the experiences of curricular theories and practices. This work brings together theorists that inform a cultural ecological analysis of the environmental crisis by exploring the ways in which language informs ways of knowing and being as they outline how metaphor plays a major role in human relationships with natural and reconstructed environments. This book will be of interest to educational researchers and practitioners who will find the text important for envisioning education as an endeavour that situates learning in relation to and informed by an Indigenous Environmental Studies and Eco-justice Education frameworks. This integrated collection of theory and practice of environmental and Indigenous education is an essential tool for researchers, graduate and undergraduate students in faculties of education, environmental studies, social studies, multicultural education, curriculum theory and methods, global and comparative education, and women's studies. Moreover, this work documents methods of developing ways of implementing Indigenous and Environmental Studies in classrooms and local communities through a framework that espouses an eco-ethical consciousness. The proposed book is unique in

that it offers a wide variety of perspectives, inviting the reader to engage in a broader conversation about the multiple dimensions of the relationship between ecology, language, culture, and education in relation to the cultural roots of the environmental crisis that brings into focus the local and global commons, language and identity, and environmental justice through pedagogical approaches by faculty across North America who are actively teaching and researching in this burgeoning field. Education expert Jane Bluestein identifies seven outdated classroom management practices and recommends effective, alternative strategies that take into account how students learn today. A collection of articles written by leading experts in the school library field that explain how school teachers, librarians, and administrators can work together to improve library services and meet the needs of all students. "In the 20th century, cheap and abundant energy brought previously unimaginable advances in health, wealth, and technology, and fed an explosion in population and consumption. But this growth came at an incredible cost. Climate change, peak oil, freshwater depletion, species extinction, and a host of economic and social problems now challenge us as never before. The Post Carbon Reader features articles by some of the world's most provocative thinkers on the key drivers shaping this new century, from renewable energy and urban agriculture to social justice and systems resilience. This unprecedented collection takes a hard-nosed look at the interconnected threats of our global sustainability quandary--as well as the most promising responses. The Post Carbon Reader is a valuable resource for policymakers, college classrooms, and concerned citizens."--Publisher's description.
