Aus der Welt von BUFFY Aus jeder Menschengeneration wird ein Mädchen auserwählt Nina und ihre Zwillingschwester Artemis sind alles andere als normal. Kunststück, wenn man an der Akademie für Wächter aufwächst. Hier läuft alles etwas anders als auf gewöhnlichen Internaten. Die Teenager der Akademie werden zu Ratgebern für Jägerinnen ausgebildet jene Mädchen, die mit übernatürlichen Kräften gegen die Mächte der Finsternis kämpfen. Doch obwohl Ninas Mutter ein bedeutendes Mitglied im Rat der Wächter ist, hat

Nina den gewalttätigen Lebensstil der Wächter nie selbst angenommen. Stattdessen folgt sie dem Wunsch, Menschen zu heilen, und sucht sich ihre Nische als Sanitäterin an der Akademie. Bis zu dem Tag, an dem sich Ninas Leben für immer verändert. Dank Buffy der berühmten (und berüchtigten) Jägerin, für deren Überleben Ninas Vater sein eigenes Leben opferte, ist Nina die neue Auserwählte. Mehr als das: Sie ist die letzte Jägerin für immer! Schon während Nina ihre Fähigkeiten mit Leo, ihrem Wächter in spe, trainiert, hat sie alle Hände voll zu tun mit illegalen Monsterkämpfen, einem Glücksgeföhle fressenden Dämon und einer schattenhaften Gestalt, die sich in Ninas Träumen herumtreibt. Doch erst, als die ersten Leichen auftauchen, werden Ninas neue Kräfte wirklich auf die Probe gestellt denn jemand, den sie liebt, könnte das nächste Opfer sein. Eins ist klar: Auserwählt zu werden ist einfach. Selbst eine Wahl zu treffen ist jedoch verdammt schwer.

Excerpt from The Influence of the Time Interval Upon the Rate of Learning in the White Rat: A Dissertation

The purposes of the present historical section are: 1) To bring together for critical consideration all the data reported up to the present time on the rate of learning in successive association; 2) To present a brief critical review of the experimental literature upon the subject of simultaneous and successive presentation in association; 3) To examine all data now published on the strength of function of association in the backward as compared to the forward direction; 4) To show that the evidence is inconclusive because of its scantiness and, in some cases, its general

character. Due to the fact that in some of the experiments reviewed more than one of the above-named issues is discussed, it was deemed expedient to present the full report in each case rather than to attempt presentation by topics. Criticism and discussion have in some cases been deferred to the Theoretical Section. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. The classic edition of *Even the Rat Was White* presents a history of prejudice within the field of Social Psychology--now at a more affordable cost! *Even the Rat Was White* views history from all perspectives in the quest for historical accuracy. Histories and other background materials are presented in detail concerning early African-American psychologists and their scientific

contributions, as well as their problems, views, and concerns of the field of social psychology. Archival documents that are not often found in mainstream resources are uncovered through the use of journals and magazines, such as the Journal of Black Psychology, the Journal of Negro Education, and Crisis. The text is divided into three parts. Part I, "Psychology and Racial Differences," expands and updates historical materials that helped form racial stereotypes and negative views towards African-Americans. Part II, "Psychology and Psychologists," is updated with specifics of what and how psychology was taught in the pre-1970 Black colleges, and brings forward the contributions of Black psychologists. Part III, "Conclusion," discusses the implication of the previous chapters and the impact of new historical information on the field of psychology. Ruby wants to find a friend...but will she be able to find a rat who likes the same things she does?Text type: Narrative - fnatasy An engaging and accessible introduction to understanding human behaviour and development from a psychological perspective. Written by a psychologist with extensive teaching experience, it offers a clear and systematic exploration of psychological concepts and

research, and discussion of their relevance for social work practice. The psychological framework provides thematic coherence for a uniquely wide range of material, from brain development to communication skills, psychiatric diagnoses to forms of discrimination. With a logical and intuitive structure, it's perfect for Human Growth and Development modules and other Social Work modules with psychological content, enabling students to see how different elements of theory and research connect together for practical application. Reviews of Environmental Contamination and Toxicology provides detailed review articles concerned with aspects of chemical contaminants, including pesticides, in the total environment with toxicological considerations and consequences. Australia is home to an incredible diversity of native animals. While Australian animals are among the most unique in the world, they are also among the most endangered, with hundreds currently on the brink of extinction. We must act quickly if we are to save these species, as once gone, they are gone forever. Extinct is a collection of artworks from established and emerging Australian fine artists, each depicting an Australian animal that has already, for various reasons, tumbled over the edge into extinction. Extinct laments their loss, but also celebrates their former existence, diversity and significance. The stunning artworks are accompanied by stories of each animal, highlighting the importance of what we have lost, so that we appreciate what we have not lost yet. Extinct features artworks from Sue Anderson, Brook Garru Andrew, Andrew Baines, Elizabeth Banfield, Sally

Bourke, Jacob Boylan, Nadine Christensen, Simon Collins, Lottie Consalvo, Henry Curchod, Sarah Faulkner, Dianne Fogwell, David Frazer, Martin George, Bruce Goold, Eliza Gosse, Simone Griffin, Johanna Hildebrandt, Miles Howard-Wilks, Nick Howson, Brendan Huntley, Ben Jones, Alex Latham, Rosemary Lee, Amanda Marburg, Chris Mason, Terry Matassoni, Rick Matear, Eden Menta, Reg Mombassa, Tom O'Hern, Bernard Ollis, Emma Phillips, Nick Pont, Geoffrey Ricardo, Sally Robinson, Anthony Romagnano, Gwen Scott, Marina Strocchi, Jenny Watson and Allie Webb. Aliens live among us. Thousands of species of nonnative flora and fauna have taken up residence within U.S. borders. Our lawns sprout African grasses, our roadsides flower with European weeds, and our homes harbor Asian, European, and African pests. Misguided enthusiasts deliberately introduced carp, kudzu, and starlings. And the American cowboy spread such alien life forms as cows, horses, tumbleweed, and anthrax, supplanting and supplementing the often unexpected ways "Native" Americans influenced the environment. Aliens in the Backyard recounts the origins and impacts of these and other nonindigenous species on our environment and pays overdue tribute to the resolve of nature to survive in the face of challenge and change. In considering the new home that imported species have made for themselves on the continent, John Leland departs from those environmentalists who universally decry the invasion of outsiders. Instead Leland finds that uncovering stories of alien arrivals and assimilation is a more intriguing—and ultimately more beneficial—endeavor. Mixing natural history with engaging anecdotes, Leland cuts through

problematic myths coloring our grasp of the natural world and suggests that how these alien species have reshaped our landscape is now as much a part of our shared heritage as tales of our presidents and politics. Simultaneously he poses questions about which of our accepted icons are truly American (not apple pie or Kentucky bluegrass; not Idaho potatoes or Boston ivy). Leland's ode to survival reveals how plant and animal immigrants have made the country as much an environmental melting pot as its famed melding of human cultures, and he invites us to reconsider what it means to be American. In *Medicine of Australian Mammals*, more than 30 experts present the most current information available on the medical management of all taxa of Australian native mammals. This comprehensive text is divided into two parts. The first includes chapters on general topics relevant to the medical management of captive and free-ranging Australian native mammals such as: veterinary considerations for the rescue, treatment, rehabilitation and release of wildlife; veterinary aspects of hand-rearing orphaned marsupials; marine mammal strandings and the role of the veterinarian; and wildlife health investigation and necropsy of Australian mammals. The second part covers the medicine of specific taxa of Australian native mammals. Detailed information on taxonomy, distribution, biology, anatomy, physiology, reproduction, husbandry, nutrition, physical and chemical restraint, clinical pathology, hand-rearing, diseases, zoonoses, therapeutics, reproductive management and surgery is included. This practical, one-source reference is complemented by detailed photographs and illustrations, as well

as tables listing reproductive and physiological data, diets, haematology and biochemistry values, and drug formularies. Appendices include a checklist of the mammals of Australia and its territories and a guide to the identification of common parasites of Australian mammals. *Medicine of Australian Mammals* is clinically oriented and is a must-have for veterinary clinicians, no matter how experienced. The book will also be of use to veterinary students, researchers, biologists, zoologists, wildlife carers and other wildlife professionals.
