*Faith and Philosophy* Jan 29 2020 Excerpt from Faith and Philosophy: Essays on Some Tendencies of the Day These essays will be found to bear more or less directly on questions which affect the present position and prospects of the Church of England very urgently. They are now revised and republished, having appeared in various forms during the last ten years, in the hope that they may contribute, however slightly, amid the peculiar dangers and difficulties of our day, to calm the fierceness of controversy, and to indicate a sure standing-ground for minds perplexed by the apparently, although not really, conflicting claims of Faith and Reason. *Reality and Experience* Nov 20 2021 Philosophically, there is a book which was a tremendous experience for me: Eino Kaila's psychology of the Personality \_ His thesis that man lives strictly according to his needs - negative and positive - was shattering to me, but terribly true. And I built on this ground. Ingmar Bergman J 1. This introductory essay is neither intended to be a full presentation nor to be a critical evaluation of the contributions to philosophy made by Eino Kaila. Kaila's work will speak to the reader through the four papers here published in English translation from the German. They belong in the tradition of the Vienna Circle and of logical empiricism. They cover, however, only one period or sector of Kaila's rich and varied life-work. This is the sector best integrated into the mainstream of contemporary philosophic thinking. The primary aim of this essay is to portray an impressive intellectual personality and to make a modest contribution to Finnish and Scandinavian intellectual history. Much of its content may be thought to be of 'local' relevance only. But considering the position which Kaila held in his country and considering his decisive influence on the development of philosophy in Finland, I hope that this local background will also interest an international circle of readers.

*Shadows of Being* Dec 22 2021 This book is a study of the phenomena of shadows, meant in a broader sense as "symbolic forms". The shadow is a less real, "surface" replica of some more real form. From the Platonic point of view, empirical objects are "shadows of ideas", while from the modern "natural" point of view, shadows are seen and conceived primarily as "weaker" replicas of bodies, which give evidence of their material reality. In the first three essays here, several topics from the Ancient Egypt and Greece to modern arts and sciences are considered, while in the fourth essay, the contemporary virtual reality, cyber-technology and the internet as our parallel "shadow world" are discussed from the philosophical point of view. The main and innovative point of this book is the connection between the meaning of shadows in philosophy and art on the one hand, and their role in modern science and technology on the other. The book will appeal to a wide span of readers, from academic circles, students, and artists, to the general reader interested in the humanities, especially in philosophy and art.

**The Claim to Community** May 03 2020 This collection of essays investigates the relevance of Stanley Cavell's work to political philosophy.

*Philosophical Essays* Sep 30 2022 The essays in this collection are not confined to any one period or any one subject. Nearly every one, in the author's words, is "an attempt to understand some short passage from the work of some philosopher, teasing the passage with analogies of sense. If one were to describe the method, as Descartes described his method, the method of doubt, perhaps it might best be described as the method of failure."

**The Time is Now. Essays on the Philosophy of Becoming** May 27 2022 The time for what? The title of Mihaela Gligor's edited collection is wonderfully flexible, as anything having to do with time should be. There is something not only boundless about time, but also raw and untamed. In its pure form, time would be too much for us to handle. We would be crushed by the sheer immensity of it, or else we would lose our minds trying to make sense of such unmediated time. Luckily, for the most part we don't experience time in its pure form. Time comes to us already processed: shaped, engineered, tamed. The volume does fine justice to the notion that we experience time as already shaped by religion, politics, and culture. Whether its contributions cover religious or political figures, philosophers or poets, mystics or physicists, they show – sometimes explicitly, sometimes more discreetly – how difficult it is to deal with time in a pure, unmediated form. The contributors' cultural, religious, and intellectual rooting inform the way think about time, just as about anything else. Which, far from being a weakness, is something to be recognized and celebrated. (Cotic? Br?d??an, Texas Tech University, U.S.A.)

*The Engaged Intellect* Apr 01 2020 The Engaged Intellect collects important essays of John McDowell. Each involves a sustained engagement with the views of an important philosopher and is characterized by a modesty that is partly temperamental and partly methodological. It is typical of McDowell to represent his own best insights either as already to be found in the writings of his heroes (Aristotle, Wittgenstein, Gadamer, and Sellars) or as inevitably emerging from a charitable modification of the views of those (such as Anscombe, Sellars, Davidson, Evans, Rorty, Dreyfus, and Brandom) subjected here to criticism. McDowell therefore develops his own philosophical picture in these pages through a method of indirection. The method is one of intervening in a philosophical dialectic at a characteristic juncture—in which it is difficult to avoid the feeling that further progress is required. McDowell shows how progress is to be achieved by preserving what is most attractive in the views of those he is in conversation with, while whittling away their weaknesses. As he practices this method, what emerges through the volume is the unity of McDowell's own views. The combination of philosophical breadth with dialectical depth—of intricate argumentative detail with overall philosophical coherence—marks McDowell as one of the most compelling philosophers of our time.

Philosophy of Law as an Integral Part of Philosophy May 15 2021 "This edited collection includes contributions from expert philosophers of law and considers the work of one of the most important legal philosophers of our time, Professor Gerald J Postema. The chapters dig deep into important camps of Postema's rich theoretical project including: - the value of the rule of law; - the ideal of integrity in adjudication; - his works on analogical reasoning; - the methodology of jurisprudence; - dialogues with Ronald Dworkin, Joseph Raz, Frederick Schauer and HLA Hart. It includes an original article by Professor Postema, in which he develops his conception of the rule of law and replies to some objections to previous works, and an interview in which he provides a fascinating and unique insight into his philosophy of law"--

*Essays on Actions and Events* May 07 2023 "Including two new essays, this volume is an updated edition of Davidson's classic *Essays on Actions and Events* (1980). A superb work on the nature of human action, it features influential discussions of numerous topics. These include the freedom to act; weakness of the will; the logical form of talk about actions, intentions, and causality; the logic of practical reasoning; Hume's theory of the indirect passions; and the nature and limits of decision theory."--BOOK JACKET.

**Philosophical Essays** Aug 30 2022 Excerpt from *Philosophical Essays* The first three essays are concerned with ethical subjects, while the last four are concerned with the nature of truth. I include among the ethical essays the one on *The Study of Mathematics*, because this essay is concerned rather with the value of mathematics than with an attempt to state what mathematics is. Of the four essays which are concerned with Truth, two deal with Pragmatism, whose chief novelty is a new definition of i truth. One deals with the conception of truth advocated by those philosophers who are more or less affiliated to Hegel, while the last endeavours to set forth briefly, without technicalities, the view of truth which commends itself to the author. All the essays, with the possible exception of the one on *The Monistic Theory of Truth*, are designed to appeal to those who take an interest in philosophical questions without having had a professional training in philosophy. *Practical Thought* Dec 30 2019 *Practical Thought: Essays on Reasons, Intuition, and Action* presents a selection of Jonathan Dancy's most important philosophical essays since the late 1970s, focusing on the central themes of his work: metaethics, moral metaphysics, the theory of motivation, and the British Intuitionists. The twenty-four essays in this book chart his intellectual journey.

**Propositions, Functions, and Analysis** Feb 09 2021 The work of Bertrand Russell has a decisive influence on the emergence of analytic philosophy, and on its subsequent development. The essays in this text recapture aspects of Russell's philosophical vision during his most influential period, the two decades following his break with Idealism in 1899.

**Philosophical Essays, Volume 1** Jul 29 2022 The two volumes of *Philosophical Essays* bring together the most important essays written by one of the world's foremost philosophers of language. Scott Soames has selected thirty-one essays spanning nearly three decades of thinking about linguistic meaning and the philosophical significance of language. A judicious collection of old and new, these volumes include sixteen essays published in the 1980s and 1990s, nine published since 2000, and six new essays. The essays in Volume 1 investigate what linguistic meaning is; how the meaning of a sentence is related to the use we make of it; what we should expect from empirical theories of the meaning of the languages we speak; and how a sound theoretical grasp of the intricate relationship between meaning and use can improve the interpretation of legal texts. The essays in Volume 2 illustrate the significance of linguistic concerns for a broad range of philosophical topics--including the relationship between language and thought; the objects of belief, assertion, and other propositional attitudes; the distinction between metaphysical and epistemic possibility; the nature of necessity, actuality, and possible worlds; the necessary a posteriori and the contingent a priori; truth, vagueness, and partial definition; and skepticism about meaning and mind. The two volumes of *Philosophical Essays* are essential for anyone working on the philosophy of language.

Reflections Nov 08 2020

**Essays on the philosophy of Wittgenstein** Jul 17 2021 This first of two volumes brings together invited papers of the 32nd International Wittgenstein Symposium (Kirchberg/W. (Austria), 2009). The relation between language and the world was undoubtedly one if not the central issue in Wittgenstein's whole philosophical oeuvre. His one hundred and twentieth birthday provided an occasion for foregrounding this aspect of his work. A special workshop was dedicated to new aspects of Wittgenstein's Nachlass. In this volume Frank Cioffi, Peter Hacker, Ian Hacking, Roy Harris, Lars Hertzberg, Jaakko Hintikka, Marie McGinn, Danièle Moyal-Sharrock, Hans Sluga among others provide substantial contributions on various aspects of Wittgenstein's writings such as the philosophy of mathematics, the problem of rule following or the relation between meaning and use.

Essays on Heidegger and Others: Volume 2 Apr 13 2021 The second volume pursues the themes of the first volume in the context of discussions of recent European philosophy focusing on the work of Heidegger and Derrida. His four essays on Heidegger include "Philosophy as Science, as Metaphor and as Politics" and "Heidegger, Kundera, and Dickens;" three essays on Derrida (including "Deconstruction and

Circumvention" and "Is Derrida a Transcendental Philosopher?") are followed by a discussion of the uses to which Paul de Man and his followers have put certain Derridean ideas. Rorty's concluding essays broaden outward with an essay on "Freud and Moral Deliberation" and essays discussing the social theories and political attitudes of various contemporary figures--Foucault, Lyotard, Habermas, Unger, and Castoriadis.

Critical Essays on the Philosophy of R. G. Collingwood Jun 27 2022

**Science, Politics and Social Practice** Sep 06 2020 In three volumes, a distinguished group of scholars from a variety of disciplines in the natural and social sciences, the humanities and the arts contribute essays in honor of Robert S. Cohen, on the occasion of his 70th birthday. The range of the essays, as well as their originality, and their critical and historical depth, pay tribute to the extraordinary scope of Professor Cohen's intellectual interests, as a scientist-philosopher and a humanist, and also to his engagement in the world of social and political practice. In *Science, Politics and Social Practice*, (Volume II of *Essays in Honor of Robert S. Cohen*), an international group of scholars -- philosophers, sociologists, historians, and political scientists -- discuss issues at the cutting edge of contemporary social and political thought, and its bearing on science. Several essays discuss the relations of Marxism to science, and specifically, to the philosophies of science of Carnap and Popper, as well as Soviet Marxism, and the effects of Stalinism on Soviet science. There are also essays on the philosophy and methodology of the social sciences, on questions of method and aim in historical narrative, on the issue of cultural relativism, and more.

**Essays on Skepticism** Aug 06 2020 The problem of skepticism about knowledge of the external world has been the centrepiece of epistemology since Descartes. In the last 25 years, there has been a keen focus of interest on the problem, with a number of new insights by the best contemporary epistemologists and philosophers of mind. Anthony Brueckner is recognized as one of the leading contemporary investigators of the problem of skepticism. *Essays on Skepticism* collects Brueckner's most important work in this area, providing a connected and comprehensive guide to the complex state of play on this intensively studied area of philosophy. The guiding questions of this volume are: Can we have knowledge of the external world of things outside our minds? Can we have knowledge of the internal world of our own contentful mental states? The work divides into four sections: I. Transcendental Arguments against Skepticism; II. Semantic Answers to Skepticism; III. Self-knowledge; IV. Skepticism and Epistemic Closure.

The Form of Things Dec 10 2020 The bestseller from our pre-eminent philosopher, A.C. Grayling 'Grief and loneliness, depression, despair and failure - those things are the common human lot at least at times in all our lives'. Yet it is philosophy which, while not providing an answer to these problems, can enable us to prepare for them, and create strategies with which to deal with them. It is only through reflecting upon the world around us, reading, thinking, questioning, enjoying, that we can inculcate understanding, tolerance and importantly the courage to live our lives. It is our responsibility to live such 'considered lives' and to realise that we are authors of a narrative that can be shaped and controlled. This is the fifth in a series of essay miscellanies from our foremost philosopher A.C. Grayling, reflecting upon the form of our world and its multiplicity. The essays are grouped by theme into reflections upon life and the standards we live by, including vivid polemics and perceptive pieces on significant thinkers, contemporary rights and liberties issues. This book brilliantly articulates the philosophical debate and reflection that is needed to prepare us for life in the twenty-first century.

*A Philosophical Essay on Probabilities* Apr 06 2023 In this, his most famous work, Pierre-Simon, Marquis de Laplace lays out a system for reasoning based on probability. The single most famous piece introduced in this work is the rule of succession, which calculates the probability that a trial will be a success based on the number of times it has succeeded in the past. Students of mathematics will find *A Philosophical Essay on Probabilities* an essential read for understanding this complex field of study and applying its truths to their lives. French mathematician PIERRE-SIMON, MARQUIS DE LAPLACE (1749-1827) was essential in the formation of mathematical physics. He spent much of his life working on mathematical astronomy and even suggested the existence of black holes. Laplace is also known for his work on probability.

**Truth, Thought, Reason** Mar 01 2020 Tyler Burge presents a collection of his seminal essays on Gottlob Frege (1848-1925), who has a strong claim to be seen as the founder of modern analytic philosophy, and whose work remains at the centre of philosophical debate today. *Truth, Thought, Reason* gathers some of Burge's most influential work from the last twenty-five years, and also features important new material, including a substantial introduction and postscripts to four of the ten papers. It will be an essential resource for any historian of modern philosophy, and for anyone working on philosophy of language, epistemology, or philosophical logic.

**An Essay on Philosophical Method** Oct 20 2021

**Representations** Aug 18 2021 A collection of eleven essays dealing with methodological and empirical issues in cognitive science and in the philosophy of mind, *Representations* convincingly connects philosophical speculation to concrete empirical research. One of the outstanding methodological issues dealt with is the status of functionalism considered as an alternative to behavioristic and physicalistic accounts of mental states and properties. The other issue is the status of reductionism considered as an account of the relation between the psychological and physical sciences. The first chapters present the main lines of argument which have made functionalism the currently favored philosophical approach to ontology of the mental. The outlines of a psychology of propositional attitudes which emerges from consideration of current developments in cognitive science are contained in the remaining essays. Not all of these essays are re-presentations. The new introductory essay seeks to present an overview and gives some detailed proposals about the contribution that functionalism makes to the solutions of problems about intentionality. The concluding essay, also not previously published, is a sustained examination of the relation between theories about the structure of concepts and theories about how they are learned. Finally, the essay "Three cheers for propositional attitudes", a critical examination of some of D. C. Dennett's ideas, has been completely rewritten for this volume. A Bradford Book.

*Philosophy as a Way of Life* Apr 25 2022 *Philosophy as a Way of Life* This unique collection of essays on the late Pierre Hadot's revolutionary methodological approach to studying and practicing philosophy explores Hadot's primary conviction that philosophy itself goes beyond solving puzzles and analyzing abstract arguments. Hadot believed that philosophy is a key part of humanity's search for happiness, that it can transform our perception of the world, and thus can alter our very mode of being. His argument that the goal of philosophy is to shift our focus away from our habitual obsession with individuality, and to embrace universality and objectivity, has resonated with thinkers across the Academy – and outside it. Offering genuinely interdisciplinary analysis of Hadot's work and philosophical practice, this volume includes papers written from a gamut of philosophical, historical, and geographical perspectives. Articles address issues in the history of philosophy from Pythagoras to Descartes, by way of Islamic thought, thus corresponding to Hadot's view of the importance of philosophically based analysis of ancient texts and historical contexts. Others study the presence of ideas related to, or influenced by, Hadot in contemporary thought, from Wittgenstein to Leonard Nelson, analytic philosophy, and French postmodernism. The result is a wide-ranging publication pointing to an additional "third way" alongside the traditional approaches of Continental and analytic philosophy, one that expands our horizons with secular spiritual exercises designed to enable us to be in a fuller, more authentic way.

**A World Without Values** Jul 05 2020 What kind of properties are moral qualities, such as rightness, badness, etc? Some ethicists doubt that there are any such properties; they maintain that thinking that something

is morally wrong (for example) is comparable to thinking that something is a unicorn or a ghost. These "moral error theorists" argue that the world simply does not contain the kind of properties or objects necessary to render our moral judgments true. This radical form of moral skepticism was championed by the philosopher John Mackie (1917-1981). This anthology is a collection of philosophical essays critically examining Mackie's view.
