Doing Business in ASEAN Markets Apr 03 2021 The authors of this important book analyse the pitfalls and risks of doing business in ASEAN countries that are mostly absent in Western markets, covering various strategic, external, operational, and legal-cultural challenges for international companies. *Doing Business in ASEAN Emerging Markets* crucially addresses how to resolve those barriers. Encompassing issues of governance and leadership standards, the authors present case studies and practical solutions underpinned by academic research. Helping executives learn how to implement high international standards and maintain sensitivity to socio-cultural and political Asian contexts, the book highlights the need to create an international diverse and unified leadership team that will take better decisions and effectively deal with risks, and apply best corporate governance practices within an Asian context.

Critiquing Postmodernism in Contemporary Discourses of Race Feb 01 2021 *Critiquing Postmodernism in Contemporary Discourses of Race* challenges the critical emphasis on otherness in treatments of race in literary and cultural studies. Sue J. Kim deftly argues that this treatment not only perpetuates narrow identity politics, but obscures the political and economic structures that shape issues of race in literary studies. Kim's revelatory book shows how reading authors through their identity ends up neglecting both complex historical contexts and aesthetic forms. This comparative study calls for a reconsideration of the bases for critical engagement and a reading ethics that melds the best of historicist and formalist approaches to literature.

Knowledge First Jun 05 2021 'Knowledge-First' constitutes what is widely regarded as one of the most significant innovations in contemporary epistemology in the past 25 years.

Knowledge-first epistemology is the idea that knowledge per se should not be analysed in terms of its constituent parts (e.g., justification, belief), but rather that these and other notions

should be analysed in terms of the concept of knowledge. This volume features a substantive introduction and 13 original essays from leading and up-and-coming philosophers on the topic of knowledge-first philosophy. The contributors' essays range from foundational issues to applications of this project to other disciplines including the philosophy of mind, the philosophy of perception, ethics and action theory. *Knowledge First: Approaches in Epistemology and Mind* aims to provide a relatively open-ended forum for creative and original scholarship with the potential to contribute and advance debates connected with this philosophical project.

Retrofitting Suburbia Feb 25 2023 Updated with a new Introduction by the authors and a foreword by Richard Florida, this book is a comprehensive guide book for urban designers, planners, architects, developers, environmentalists, and community leaders that illustrates how existing suburban developments can be redesigned into more urban and more sustainable places. While there has been considerable attention by practitioners and academics to development in urban cores and new neighborhoods on the periphery of cities, there has been little attention to the redesign and redevelopment of existing suburbs. The authors, both architects and noted experts on the subject, show how development in existing suburbs can absorb new growth and evolve in relation to changed demographic, technological, and economic conditions. *Retrofitting Suburbia* was named winner in the Architecture & Urban Planning category of the 2009 American Publishers Awards for Professional and Scholarly Excellence (The PROSE Awards) awarded by The Professional and Scholarly Publishing (PSP) Division of the Association of American Publishers

Williamson on Knowledge Jul 18 2022 Eighteen leading philosophers offer critical assessments of Timothy Williamson's ground-breaking work on knowledge and its impact on philosophy today. They discuss epistemological issues concerning evidence, defeasibility, scepticism, testimony, assertion, and perception, and debate Williamson's central claim that knowledge is a mental state.

Services Offshoring and its Impact on the Labor Market Nov 10 2021 Services – from information technology to research to finance – are now as subject to international trade as goods have been for decades. What are the labor market consequences of the recent surge in services offshoring? While offshoring has traditionally been found to affect only less-skilled workers in industrialized countries, this study finds that services offshoring also has negative consequences for high-skilled workers. Focusing on the case of Germany, Deborah Winkler shows how services offshoring has grown, who is most affected and what policy makers can do. Winkler measures the impact of services offshoring on German productivity, employment, and employment structure. She provides a well-balanced synthesis of theoretical insights, detailed empirical analysis, and economic policy recommendations. Although her main focus is on the case of Germany, many insights are also applicable to other developed countries.

World War II German Women's Auxiliary Services Sep 20 2022 Under the Nazi regime, Hitler's conservative views on the place of housewives and mothers in society limited German women to a much less active role in the war than their British and Allied counterparts. Nevertheless, the demands of a prolonged war did see German women in a range of

uniforms as auxiliaries with the Army, Navy, Air Force and SS, particularly in the signals and air defence services. This unique book explains and illustrates these organisations and their uniforms and insignia, as well as Red Cross nurses, and auxiliaries of the Labour Corps, Customs Service, National Socialist Women's Organisation, and League of German Maidens (Hitler Youth).
