The Quirks & Quarks Question Book Jun 08 2021 • Is there really such a thing as a blue moon? • What time is it at the North Pole? • Why don't woodpeckers get concussed? • Why don't snorers wake themselves with the racket they make? • Do insects sleep? These are just a few of the intriguing questions asked and answered in The Quirks & Quarks Question Book, the first question and answer book to come out of CBC Radio's enormously popular weekly science program. Quirks & Quarks producers have combed through ten years' worth of archives to find the most puzzling questions – or the most fascinating answers to apparently simple questions – from the program's Question of the Week segment or its once-a-season all-question show. The scientists and researchers with the answers (many of whom updated their answers for the book in light of new research findings) come from all scientific disciplines and all parts of the country. What they have in common is their ability to explain serious, complicated science in layman's terms. This isn't science made simple, but science made understandable.

Introduced by the program's host for the past ten years, the genial and ever-curious Bob McDonald, The Quirks & Quarks Question Book has the answers to questions you may never have thought to ask (why does Uranus spin on a different axis from all the other planets in our solar system?) or have spent idle time wondering about (why is there a calm before a storm?). Whether you want to know if you can sweat while you swim or what the view would be like if you could travel at the speed of light, or perhaps you just want to peruse the latest scientific thinking on a wide range of topics, The Quirks & Quarks Question Book has the answer. Quirks & Quarks has been keeping Canadians up to date on the world of science for more than 25 years. Every week, the program presents the people behind the latest discoveries in the physical and natural sciences. The program also examines the political, social, environmental, and ethical implications of new developments in science and technology. Over its lifetime, Quirks & Quarks has won more than 40 national and international awards for science journalism.

Staying Married Nov 01 2020 In this groundbreaking book, Dr. Vera S. Paster, a marriage counselor and therapist, and Anita Doreen Diggs, author of The African American Resource Guide, help African American couples cope with all of the pressures on their marriage and guide them in re-discovering the joy, intimacy and passion of their relationship. Dr. Paster discusses the difficulties African American couples face, including white collar women marrying blue collar men; the problems of blended families; bringing aunts, uncles, cousins and grandparents back into your life; the stereotype of black

male as king; the heartbreak of depression, addiction, abuse and adultery; and many other important issues. In her warm, down-to-earth style, she reveals the steps that every couple must take to overcome these difficulties and put their marriage on solid footing. By showing black couples how to draw on the unique strengths of their forefathers, she gives husbands and wives the traditional tools they need to get through the tough times. In addition, she offers suggestions on what not to bring up in an argument, 50 ways to enhance your marriage, using community activism and church involvement to bring you closer together, and much more. A unique book that answers all of your questions and concerns, STAYING MARRIED is a wise voice to help you successfully build a loving relationship that will last a lifetime.
