"Given the number of well-developed informational sources available to educators and students and the focus of departments of education on learning from these sources, there is so much potential for students to grow as critical consumers of information. Being able to read informational sources closely or watch and listen to sources carefully--across all content areas--creates a path for being able to understand the world better. More than ever before, close reading has become an essential approach with students and the informational sources they are attempting to understand. In addition to addressing instruction with traditional printed texts, I address how to teach for understanding of content in videos and infographics. I have also developed a three-phase plan for learning and a matching template for lesson planning"-- Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.
