From the weirdly funny to the deathly serious, author Michael Martinelli shares stories from his childhood in the intriguing memoir *Passing Through the Clubhouse*. -At the young age of eight, Martinelli is faced with the question of why his baby sister can't walk naked wherever she wants without the threat of adults telling her what to do. He also wonders what it would be like to eat peanut butter, banana, and raspberry fluff sandwiches all the time. -Days before the start of another year of school when he'll be a fourth grader, Martinelli reconnects with a long-lost relative after the death of his aunt. -Within the throes of puberty and the summer just beginning, he begins tackling the trials and tribulations of the slow but urgent need for freedom with his best friend. -Just when he thinks his group of friends is secure, the end of middle school is in sight, and the doors of high school are about to open, Martinelli takes a ride on his dirt bike that practically costs him his life. Each story in *Passing Through the Clubhouse* provides a vivid sketch of what the world looks like through one boy's eyes from the ages of six to fourteen. Understanding and overcoming the gender gap in computer science education. The information technology revolution is transforming almost every aspect of society, but girls and women are largely out of the loop. Although women surf the Web in equal numbers to men and make a majority of online purchases, few are involved in the design and creation of new technology. It is mostly men whose perspectives and priorities inform the development of computing innovations and who reap the lion's share of the financial rewards. As only a small fraction of high school and college computer science students are female, the field is likely to remain a "male clubhouse," absent major changes. In *Unlocking the Clubhouse*, social scientist Jane Margolis and computer scientist and educator Allan Fisher examine the many influences contributing to the gender gap in computing. The book is based on interviews with more than 100 computer science students of both sexes from Carnegie Mellon University, a major center of computer science research, over a period of four years, as well as classroom observations and conversations with hundreds of college and high school faculty. The interviews capture the dynamic details of the female computing experience, from the family computer kept in a brother's bedroom to women's feelings of alienation in college computing classes. The authors investigate the familial, educational, and institutional origins of the computing gender gap. They also describe educational reforms that have made a dramatic difference at Carnegie Mellon—where the percentage of women entering the School of Computer Science rose from 7% in 1995 to 42% in 2000—and at high schools around the country.

Acquired brain injury (ABI) describes damage to the brain that occurs after birth, caused by traumatic injury such as an accident or fall, or by non-traumatic cause such as substance abuse, stroke, or disease. Today's medical techniques are improving the survival rate for people of all ages diagnosed with ABI, and current trends in rehabilitation are supporting these individuals returning to live, attend school, and work in their communities. Yet strategies on the best way of providing community participation vary among rehabilitation experts. Because many of survivors of ABI do not and will not return to the status quo of their former lives it is important to examine what constitutes best and promising practices in this area. This casebook is the world's first compilation of evidence-informed programs that foster community participation for people of all ages with brain injury. With this review, we elicited and carefully examined existing programmatic efforts that combine emphasis on the individual, the social, and the service systems in a way that captures community participation as a complex process of interactive change in the person-environment relationship – programs that do not divorce ABI survivors from their contexts, and where participation efforts facilitate positive change in the social and political context. We considered community-based programs to be programs where individuals and families actively participate in their own therapy (rehabilitation) and take responsibility for their own health or that of a family/community member. Each case study chapter depicts a program chosen on its extraordinary merits to provide community participation to its clients. The chapters are cowritten by the stakeholder and a researcher, giving a complete perspective of how the program was established and continues to operate, and provides evidence of excellence. After Penny, Tina, and Tom convert an old shed into their clubhouse, Tina and Tom's mom asks if they can help her find her keys, and they use different clues and the help of Penny's pony, Pepper, to solve the mystery. Even though teenaged girl Jackie Mitchell once struck out Babe Ruth and Lou Gehrig, women are still striking out on the hardball diamond. This book builds on recently published histories of women as amateur and professional players, umpires, sports commentators and fans to analyze the cultural and historical contexts for excluding females from America's pastime. Drawing on anthropological and feminist perspectives, the book examines the ways that constructions of women's bodies and normative social roles have pushed them toward softball instead of baseball. Sportswriter accounts, Title IX sex-discrimination suits, and interviews with players explore the obstacles and the social isolation of females who join all-male baseball teams, while also discussing policies that inhibit the practice. A sociological examination of life within the subworld of women's professional golf that explores the interpersonal relations between athletes, fans, and sponsors on the LPGA tour and looks at tensions between gender, class, and prowess within the social world of golf. *THE CLUBHOUSE CHRONICLES (The Clubgoer's Handbook)* is a book that reveals the untold stories about the events that happen within the clubhouse walls (dance clubs, pubs, regular bars, and strip bars). It uncovers the behavior and the patterns by which ordinary people, the working and nonworking classes operate under the influence of money, alcohol, drugs, and their emotions in reaction to the opposite sex. In fact, it is an unbelievable phenomenon. And as you read this book page by page, some of the observable facts will leave you grasping for more. There is no limitation to what people who are under the influence of alcohol, drugs, or sexist emotions can say or/and do. Sometimes their words are just not enough; their temperament speaks for them, good or bad. It doesn't matter. The effects of the alcohol or drugs or emotions kick in, and the act is turned on. "Woo! Woo! Woo!" some might say while reading this book. "No way! This is crazy," others may perhaps verbalize. And after reading this book, whether or not you believe in the particular revelation isn't what is important. What is important is the fact that these events even existed.
