"Pickup" and "sports utility vehicle" seem like quaint names for these workhorses. More and more, they're what people tune up, trick out, and take on the road (or off). This book aims to help drivers make the most of their machines. With 101 projects running the gamut from installing light bars and brush guards to gearing up for hard-core horsepower and high-performance feats, this book will show truck and SUV owners of all stripes how to personalize their rides. 101 Performance Projects for Your Pickup and SUV offers easy-to-

follow, clearly illustrated how-to information on everything from appearance modifications to more extensive upgrades, with plenty of instructions for the many bolt-on solutions that are available in the marketplace. Planning, tools, expenses, pros, and cons: it's all here. The author walks owners through the nuts and bolts of lowering and lift kits, running boards and in-car entertainment systems, winches, wheels and tires, and the full range of installations and accessories that will take a truck or an SUV to the next level. As Toyota skids into an ocean of problems and uncertainty continues in the U.S. automotive industry,

Lemon-Aid Used Cars and Trucks 2011/2012 shows buyers how to pick the cheapest and most reliable vehicles from the past 30 years. Lemon-Aid guides are unlike any other car and truck books on the market. Phil Edmonston, Canada's automotive Dr. Phil for 40 years, pulls no punches. Like five books in one, Lemon-Aid Used Cars and Trucks is an exposé of car scams and gas consumption lies; a do-it-yourself service manual; an independent guide that covers beaters, lemons, and collectibles; an archive of secret service bulletins granting free repairs; and a legal primer that even lawyers can't beat! Phil delivers the

goods on free fixes for Chrysler, Ford, and GM engine, transmission, brake, and paint defects; lets you know about Corvette and Mustang tops that fly off; gives the lowdown on Honda, Hyundai, and Toyota engines and transmissions; and provides the latest information on computer module glitches. Bronze Medal Winner, 2016 Independent Publisher (IPPY) Book Awards: Best Regional Non-Fiction - Europe. Finalist, 2016 Next Generation Indie Book Awards: Travel. An engaging and informative chronicle of a hiking and wildlife research expedition along the Carpathian and Sudety Mountains, from Romania to Germany, some

800 miles as the crow flies. (This volume, Part 1, covers the first half of the journey, through Romania and Ukraine.) On the trail of wolves, we are led deep into the misty hills, enchanting forests, and intriguing history of this fabled landscape, where encounters with wolves, bears, and lynx; werewolves, vampires, and witches; lumberjacks, shepherds, and outlaws; poets, tyrants, and saints; deities, demons, and sirens—and such ancient peoples as Proto-Indo-Europeans, Dacians, and Rus', and such imposing historical figures as Attila the Hun, Vlad the Impaler, and Volodymyr the Great—provide broad insight into the natural, historical, and

mythological forces that have shaped, and continue to shape, the nations, cultures, and psyches along the way. 63 beautiful color photographs also emblaze this memorable trek. The Clan of the Cave Bear meets X-Files with an historical twist in The Two-Horned King. According to an ancient prophecy, mentioned in all the Abrahamic religions, Gog and Magog are the legendary enemies who will one day invade the world and cause Armageddon. But what if Gog and Magog were not what everyone had thought or imagined? What if Gog and Magog were part of a hidden history involving Alexander the Great's quest for immortality?

When a team of archaeologists make a mysterious discovery in a long-forgotten cave in Tajikistan, the prophecy begins to unravel. There, they find the jawbone of a child, a massive burial pit filled with bones, and inscriptions on the walls of the cavern. Even more fascinating is that the location of the cavern is where legend states that Alexander the Great fought and drowned this ancient and mysterious tribe for no apparent reason. But when the team investigating the cave is killed in an “accident,” Dr. Sarah Adams, an expert in natural language processing, is recruited along with her fiancé Rashad by Sam Kidd, a philanthropist and CEO

of a tech conglomerate, to figure out the connection between the cave’s text and an ancient corpse stumbled upon in the mountains of Iran. Jim McCoy, an anthropological geneticist, is also recruited. Together, they must use everything from quantum physics, ancient text decoding, and human evolution theories to uncover the mysteries behind the discoveries and a legendary icon. What Sarah, Rashad, Jim and the team discover is a shattering realization that will change the world’s understanding of archaic humans forever. If Armageddon doesn’t happen first. The International Space Station (ISS) is the largest

man-made structure to orbit Earth and has been conducting research for close to a decade and a half. Yet it is only the latest in a long line of space stations and laboratories that have flown in orbit since the early 1970s. The histories of these earlier programs have been all but forgotten as the public focused on other, higher-profile adventures such as the Apollo moon landings. A vast trove of stories filled with excitement, danger, humor, sadness, failure, and success, Outposts on the Frontier reveals how the Soviets and the Americans combined strengths to build space stations over the past fifty years. At the heart of these scientific advances are

people of both greatness and modesty. Jay Chladek documents the historical tapestry of the people, the early attempts at space station programs, and how astronauts and engineers have contributed to and shaped the ISS in surprising ways. Outposts on the Frontier delves into the intriguing stories behind the USAF Manned Orbiting Laboratory, the Almaz and Salyut programs, Skylab, the Apollo-Soyuz Test Project, Spacelab, Mir station, Spacehab, and the ISS and gives past-due attention to Vladimir Chelomei, the Russian designer whose influence in space station development is as significant as Sergei Korolev's

in rocketry. Outposts on the Frontier is an informative and dynamic history of humankind's first outposts on the frontier of space. "Since its first auto test 50 years ago, Consumer Reports has become the No. 1 source that car buyers turn to when buying a new or used vehicle" - USA Today. Consumer Reports is the definitive authority on unbiased automotive ratings. A thrilling chronicle of the tragedy-ridden history of climbing the world's most difficult and unpredictable mountain, by the bestselling authors of *The Mountain* and *No Shortcuts to the Top* "Gripping . . . reveals a good deal about the rarefied noble-gonzo world of high-altitude mountaineering."—The New York Times Ed Viesturs, one of the world's premier high-altitude mountaineers, explores

the remarkable history of K2 and of those who have attempted to conquer it. At the same time, he probes the mountain's most memorable sagas in order to illustrate lessons about the fundamental questions mountaineering raises—questions of risk, ambition, loyalty to one's teammates, self-sacrifice, and the price of glory. Viesturs knows the mountain firsthand. He and renowned alpinist Scott Fischer climbed it in 1992 and got caught in an avalanche that sent them sliding to almost certain death before Ed managed to get into a self-arrest position with his ice ax and stop both his fall and Scott's. Focusing on seven of

the mountain's most dramatic campaigns, from his own troubled ascent to the 2008 tragedy, Viesturs crafts an edge-of-your-seat narrative that climbers and armchair travelers alike will find unforgettably compelling. With photographs from Viesturs's personal collection and from historical sources, this is the definitive account of the world's ultimate mountain, and of the lessons that can be gleaned from struggling toward its elusive summit. A comprehensive, highly readable account of complex, technical, political and human endeavor and a worthy successor to *Creating the International Space Station* (Springer Praxis,

January 2002) by David Harland and John Catchpole. This volume details for the first time the construction and occupation of the International Space Station from 2002 through to 2008, when it should reach American "Core Complete". The UK Independence Party (Ukip) is the most significant new force in British politics for a generation. Under the leadership of Nigel Farage, the party has enjoyed a remarkable rise, winning the 2014 European Parliament elections as well as two parliamentary by-elections, and attracting mainstream defectors to achieve major party status. By the time of the 2015 general

election, Farage and Ukip stood on the threshold of becoming a major force at Westminster. This account is a must-read for anyone interested in the inside story of Ukip's quest to change British politics during one of the most unpredictable and dramatic elections in recent history. Based on unprecedented access to the party and its key players, the book pulls back the curtain on one of the most intriguing campaigns in living memory. It includes behind the scenes observations from the campaign trail and more than one hundred interviews - with leading Ukip insiders such as Nigel Farage, Douglas Carswell, and Mark Reckless,

as well as major donors, strategists, and figures from across the political landscape as they grappled with Ukip's rise. Matthew Goodwin and Caitlin Milazzo reveal what really happened during the 2015 election campaign and in the by-elections and defections which preceded it, providing detailed accounts of the critical moments that shaped both the election itself and British politics more widely. The book also makes extensive use of British Election Study data from over five decades to answer important questions about the rise of Ukip and what it signifies. Who voted for Ukip and why? How are political

loyalties in Britain changing over time? What are the deeper currents that have made Ukip's rise possible and will continue to shape its future? And what does the party's campaign for power reveal about the current evolution of British politics and society? UKIP takes readers inside the campaign, telling for the first time the exciting inside story of a new party attempting to redraw the map of British politics. Presents a detailed guide to ocean cruising, with reviews of cruise ships and comparisons based on cabin facilities, service, destinations, and food, with special advice for singles, families, seniors, and the physically handicapped.
