COLLECTING: Star Wars: Legacy (2013) 1-18; material from Star Wars Tales (1999) 19, Star Wars Visionaries (2005) 1 This is the first book to describe Arturo Toscanini's activities - the life he led, his concerts and recording sessions - during his visits to London and elsewhere in Britain in the years 1900-1952. Offering both a short history and a theoretical framework, this book is the first extended study of the soundtracked book as a media form. A soundtracked book is a print or digital publication for which a recorded, musical complement has been produced. Early examples were primarily developed for the children's market, but by the middle of the twentieth century, ethnographers had begun producing book-and-record combinations that used print to contextualize musical artifacts. The last half-century has witnessed the rapid expansion of the adult market, including soundtracked novels from celebrated writers such as Ursula K. Le Guin, Kathy Acker, and Mark Z. Danielewski. While often dismissed as gimmicks, this volume argues that soundtracked books represent an interesting case study in media consumption. Unlike synchronous multimedia forms, the vast majority of soundtracked books require that audience activity be split between reading and listening, thus defining the user experience and often shaping the content of singing books as well. Mapping the form's material evolution, this book charts a previously unconsidered pathway through more than a century of recording formats and packaging strategies, emphasizing the synergies and symbioses that characterize the marriage of sound and print. As such, it will be of value to scholars and postgraduate students working in media studies, literary studies, and sound studies. The menstrual product industry has played a large role in shaping the last hundred years of menstrual culture, from technological innovation to creative advertising, education in classrooms and as employers of thousands in factories around the world. How much do we know about this sector and how has it changed in later decades? What constitutes 'the industry', who works in it, and how is it adapting to the current menstrual equity movement? Cash Flow provides a new academic study of the menstrual corporate landscape that links its twentieth-century origins to the current 'menstrual moment'. Drawing on a range of previously unexplored archival materials and interviews with industry insiders, each chapter examines one key company and brand: Saba in Norway, Essity in Sweden, Tambrands in the Soviet Union, Procter & Gamble in Britain and Europe, Kimberly-Clark in North America, and start-ups Clue and Thinx. By engaging with these corporate collections, the book highlights how the industry has survived as its consumers continually change. Fifty years after - almost / F. The Legacy Collection: Book 1: Maid for the Billionaire Book 2: For Love or Legacy Book 3: Bedding the Billionaire Book 4: Saving the Sheikh Book 5: Rise of the Billionaire Book 6: Breaching the Billionaire When written sources are scarce, historians often turn to oral histories for evidence. Bodies of Evidence: The Practice of Queer Oral History is the first book to provide serious scholarly insight into the methodological practices that shape lesbian, gay, bisexual, transgender, and queer oral histories. The volume opens up a critical dialogue on the challenges of creating an archive of queer lives. Highlighting the work of fourteen authors who focus their research on queer community history, culture, and politics, each chapter pairs an oral history excerpt with an original essay in which the oral historian addresses his or her methods and practices. With an afterword by the preeminent scholar in the field, John D'Emilio, this collection enables readers to examine both a series of oral histories and analysis of the role memory, desire, sexuality, and gender play in documenting LGBTQ communities and cultures. The historical themes addressed within include lesbian bar history in San Francisco (c. 1940s, 1950s); early homophile organizing and social activism in Los Angeles (c. 1950s and 1960s); Third World Liberation and feminist antiwar activism in the U.S. and Canada (c. 1960s, 1970s); electoral politics and the career of Harvey Milk, the first openly gay elected official in San Francisco

(1970s); Latino AIDS memory and activism in San Francisco (1980s, 1990s); and the war in Iraq (2000s). The methodological themes addressed in this book that are relevant to the practice of oral history include questions of sexual self-disclosure and voyeurism in the uses of oral history methods by queer studies scholars; the intimacy between researcher and narrator negotiated through multiple oral history interviews and on-going casual conversations; the production of comparative racial and sexual identities within the context of oral history interviews; the production of in-group mythology by same-sexuality interviewing--and the possible benefits of cross-sexuality and cross-ideology interviewing; what heterosexually-identified narrators can tell us about LGBTQ life and death; the silences imposed by repressive U.S. government policy about sexual self-disclosure and the limits of permissible speech in highly politicized discourses such as "gays in the military." These themes provide new and insightful structures for thinking about oral history methods--both in general and in relation to the production of LGBTQ history. Vampires have been a fixture of film since Bela Lugosi brought Bram Stoker's *Dracula* to life on the big screen in 1931. Over the decades the genre has been far from static, as vampire narratives changed and evolved with the appetites of their viewing public. First depicted as formally dressed villains, vampires would later be portrayed as supernatural beings with some human characteristics, and still later as sympathetic figures. Focusing on 19 representative films and television productions, this critical study tracks the evolutionary changes of the screen vampire. It explores the factors that cause a genre to change and examines the alternating cycles of audience expectation. The author identifies three distinct modes of depiction: the Malignant Cycle (1931–1948), comprised primarily of the Universal films; the Erotic Cycle (1957–1985), which encompasses Hammer films and popular television shows such as *Dark Shadows*; and the Sympathetic Cycle (1987–present) including recent offerings such as *The Lost Boys*, *Interview with the Vampire* and *Buffy the Vampire Slayer*. Each film is evaluated in seven key areas including the act of the vampire biting the victim; process of the victim's infection; physical appearance and demeanor of the vampire and the vampire expert; and the eventual destruction of the vampire. Appendices include a complete filmography of the films examined. Instructors considering this book for use in a course may request an examination copy here. Engineering Hollywood tells the story of the formation of the Hollywood studio system not as the product of a genius producer, but as an industry that brought together creative practices and myriad cutting-edge technologies in ways that had never been seen before. Using extensive archival research, this book examines the role of technicians, engineers, and trade organizations in creating a stable technological infrastructure on which the studio system rested for decades. Here, the studio system is seen as a technology-dependent business with connections to the larger American industrial world. By focusing on the role played by technology, we see a new map of the studio system beyond the backlots of Los Angeles and the front offices in New York. In this study, Hollywood includes the labs of industrial manufacturers, the sales routes of independent firms, the garages of tinkerers, and the clubhouses of technicians' societies. Rather than focusing on the technical improvements in any particular motion picture tool, this book centers on the larger systems and infrastructures for dealing with technology in this creative industry. Engineering Hollywood argues that the American industry was stabilized and able to dominate the motion picture field for decades through collaboration over technologies of everyday use. Hollywood's relationship to its essential technology was fundamentally one of interdependence and cooperation-with manufacturers, trade organizations, and the competing studios. As such, Hollywood could be defined as an industry by participation in a closed system of cooperation that allowed a select group of producers and manufacturers to dominate the motion picture business for decades. Book 1: Maid for the Billionaire Book 2: For Love or Legacy Book 3: Bedding the Billionaire Book 4: Saving the Sheikh Book 5: Rise of the Billionaire Book 6: Breaching the Billionaire: Alethea's Redemption Telegrafie, Fotografie, Telefon und Radio sind ihre bürokratischen Konstitutionen nicht mehr anzusehen. Daher geraten die grundlegenden Bedingungen in Vergessenheit, die sie mit anderen Waren und Gütern der industriellen Moderne gemein hatten. Nadine Taha blickt auf den Aufstieg der nordamerikanischen Industrieforschung zwischen 1870 und 1950. Anhand von Fallstudien rekonstruiert sie die gemeinsamen Wurzeln von Massenmedien und Bürokratie. Dabei macht sie die Wirkmächtigkeit von Patenten, Labornotizbüchern, Spezifikationen und laboratorischen Reportsystemen sichtbar, die unzertrennlicher Teil der Erfindungsgeschichte technischer Medien sind. Why screens in schools—from film screenings to instructional television to personal computers—did not bring about the educational revolution promised by reformers. Long before Chromebook giveaways and remote learning, screen media technologies were enthusiastically promoted by American education reformers. Again and again, as schools deployed film screenings, television programs, and computer games, screen-based learning was touted as a cure for all educational ills. But the transformation

promised by advocates for screens in schools never happened. In this book, Victoria Cain chronicles important episodes in the history of educational technology, as reformers, technocrats, public television producers, and computer scientists tried to harness the power of screen-based media to shape successive generations of students. Cain describes how, beginning in the 1930s, champions of educational technology saw screens in schools as essential tools for training citizens, and presented films to that end. (Among the films screened for educational purposes was the notoriously racist *Birth of a Nation*.) In the 1950s and 1960s, both technocrats and leftist educators turned to screens to prepare young Americans for Cold War citizenship, and from the 1970s through the 1990s, as commercial television and personal computers arrived in classrooms, screens in schools represented an increasingly privatized vision of schooling and civic engagement. Cain argues that the story of screens in schools is not simply about efforts to develop the right technological tools; rather, it reflects ongoing tensions over citizenship, racial politics, private funding, and distrust of teachers. Ultimately, she shows that the technologies that reformers had envisioned as improving education and training students in civic participation in fact deepened educational inequities.

LINQ is the project name for a set of extensions to the .NET Framework that provide a generic approach to querying data from different data sources. LINQ made its debut in Visual Studio 2008, and became a must-have skill for .NET developers. For more information about LINQ, you can check out www.linqdev.com. Starting with code and ending with code and tailored for the VB language, Pro LINQ: Language Integrated Query in VB 2008 is a veritable treasury of LINQ examples that will save you hours, even days, of research time. Keeping you focused on the relevant LINQ principles, expert author Joseph Rattz, Jr., and VB specialist Dennis Hayes provide examples for complex models that you won't find anywhere else. In most books, you'll find plenty of simple examples to demonstrate how to use a method, but authors rarely show how to use the more complex prototypes. Pro LINQ: Language Integrated Query in VB 2008 is different. Demonstrating the overwhelming majority of LINQ operators and prototypes, Joseph Rattz, Jr., and Dennis Hayes condense their extensive experience and expertise into a desk companion that is essential for any serious .NET professional. Rather than obscure the relevant LINQ principles in code examples by focusing on a demonstration application you have no interest in writing, this book cuts right to the chase of each LINQ operator, method, or class. However, where complexity is necessary to truly demonstrate an issue, the examples are right there in the thick of it. For example, code samples demonstrating how to handle concurrency conflicts actually create concurrency conflicts so you can step through the code and see them unfold. Most books tell you about the simple stuff, while few books warn you of the pitfalls. Where Pro LINQ: Language Integrated Query in VB 2008 returns your investment is in the hours, and sometimes days, spent by the authors determining why something may not work as expected. Sometimes this results in an innocent-looking paragraph that may take you a minute to read and understand, but took days to research and explain. Face it, most technical books while informative, are dull. LINQ need not be dull. Written with a sense of humor, this book will attempt to entertain you on your journey through the wonderland of LINQ and VB 2008.

The Fourth International Conference on the History of Mathematics Education was hosted by Academy of Sciences and University of Turin (Italy). About 50 senior and junior researchers from 16 countries met for four days to talk about one topic: the history of mathematics education. In total 44 contributions were presented. The themes were Ideas, people and movements, Transmission of ideas, Teacher education, Geometry and textbooks, Textbooks – changes and origins, Curriculum and reform, Teaching in special institutions, and Teaching of geometry. In this volume you find 28 of the papers, all of them peer-reviewed. Since the first international conference on the history of mathematics education, the aim has been to develop this area of research, to attract more researchers and provide new insights that stimulate further “digging”. It is therefore very pleasing that so many new young researchers joined the conference, presenting results from ongoing or recently finished PhD projects. This makes us confident about a prosperous future of this research area as we look forward to the Fifth International Conference on the History of Mathematics Education, to be held in Utrecht, the Netherlands, in September 2017. Previous international conferences on the history of mathematics education: 2009 in Garðabær (Iceland) 2011 in Lisbon (Portugal) 2013 in Uppsala (Sweden) This book constitutes the refereed proceedings of the 8th Language and Technology Conference: Challenges for Computer Science and Linguistics, LTC 2017, held in Poznan, Poland, in November 2017. In the late nineteenth century, medical educators intent on transforming American physicians into scientifically trained, elite professionals recognized the value of medical school design for their reform efforts. Between 1893 and 1940, nearly every medical college in the country rebuilt or substantially renovated its facility. In *Building Schools, Making Doctors*, Katherine Carroll reveals how the schools constructed during this fifty-year period did more than passively house a remodeled system of medical training; they actively participated in defining and promoting an innovative pedagogy, modern science, and the new physician. Interdisciplinary and wide ranging, her study moves architecture from the periphery of medical education to the center, uncovering a network of medical educators, architects, and philanthropists who believed that the educational environment itself shaped how students learned and the type of physicians they became. Carroll offers the first comprehensive study of the science and pedagogy formulated by the buildings, the influence of the schools' donors and architects, the impact of the structures on the urban landscape and the local community, and the facilities' privileging of white men within the medical profession during this formative period for physicians and medical schools.
