*Set includes revised editions of some issues. The Manual of Business German is the essential companion for all who use German for business communication. The Manual is divided into five sections covering all the requirements for business communication, whether written or spoken. Fully bilingual, the Manual is of equal value to the relative beginner or the fluent speaker. Features include 40 spoken situations, from booking a ticket to making a sales pitch; 80 written communications covering memos, letters, faxes and resumes; facts and figures on the countries that use the language; a handy summary of the main grammar points; and a 5000-word two-way glossary of the most common business terms. Written by an experienced native and non-native speaker team working in business language education, this unique Manual of Business German is an essential one-stop reference for all students and professionals studying or working in business and management where German is used. Excerpt from A Manual of Prayers and a Guide to the Christian Life Nearly eight years have passed away, since the first edition of this little Manual was published. An adaptation in the main, of an English work known as Heygate's Manual, it was, like that, intended for a Special class of persons, amongst whom, from the beginning of his ministry, the compiler had been happily and contentedly laboring. But the book passed to a wider use than had been anticipated, gaining some*

*circulation among persons who had no other poverty save poverty of spirit. Notwithstanding this, it may still be regarded as intended for christ's Poor; since it is not merely those who are poor in this world's goods, but those who are poor in spirit, that the Lord do counts to be blessed, and thus marks for, His own. The new edition differs from preceding ones in this respect: that some matter which was in the first edition, and which was omitted in the second and third, is now re placed. But, substantially, there is no change. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Ablative tumor surgery of the head and neck region often results in severe cosmetic and functional deformities. In these cases, microvascular free-tissue transfer enables three-dimensional reconstruction of head and neck defects. The selection of adequate donor tissue and a profound knowledge of the human anatomy and the various harvesting techniques are paramount in ensuring successful reconstruction. Reflecting current surgical approaches, this book presents the most frequently used flaps in head and neck surgery, including detailed overviews as well as their respective pearls and pitfalls. Moreover, each section contains a synopsis and pre-operative checklist. The overlay-technique merges high-quality-photographs with drawings and precisely illustrates the step-to-step descriptions of the different flap harvesting techniques, making this manual in pocket size an unique and accessible reference for both doctors in training and specialists in the field of otolaryngology, head and neck, plastic, maxillofacial and skull base surgery. *Excerpt from A Manual of Physical Measurements*

*This manual is an outline of the laboratory experiments given in the one-year and the two-year courses in general Physics at the University of Minnesota. The laboratory work, in these courses, supplements the lectures and recitations, and occupies one two-hour period a week for two and four semesters respectively. The experiments given in a junior course of one semester in electrical measurements are also included in the section on electricity. It is taken for granted that the student has acquired a general knowledge of a subject before it is considered in the laboratory and*

*no attempt is made in the manual at completeness in subject-matter or in explanations. The work is done under the guidance of an instructor who furnishes any additional information necessary. The student should feel that acceptable results depend upon his own ability to properly adjust the apparatus, and he alone should plan and execute the details of the experiments, subject of course to the criticism of the instructor. We here wish to thank Prof. J. Zeleny and Mr. Paul E. Klopsteg for valuable suggestions, criticisms, and assistance during the preparation of this manual.
