Awesome S.T.E.A.M.-based science experiments you can do right at home with easy-to-find materials designed for maximum enjoyment, learning, and discovery for kids ages 8 to 12 Join the experts at the Good Housekeeping Institute Labs and explore the science you interact with every day. Using the scientific method, you'll tap into your own super-powers of logic and deduction to go on a science adventure. The engaging experiments exemplify core concepts and range from quick and simple to the more complex. Each one includes clear step-by-step instructions and color photos that demonstrate the process and end result. Plus, secondary experiments encourage young readers to build on what they've discovered. A "Mystery Solved!" explanation of the science at work helps your budding scientist understand the outcomes of each experiment. These super-fun, hands-on experiments include: Building a solar oven and making s'mores Creating an active rain cloud in a jar Using static electricity created with a balloon to power a light bulb Growing your own vegetables—from scraps! Investigating the forces that make an object sink or float And so much more! Bursting with more than 200 color photos and incredible facts, this sturdy hard cover is the perfect gift for any aspiring biologist, chemist, physicist, engineer, and mathematician! For many, their first experience of the natural world is in the pages of books and in library collections--a Paper Zoo. This stunning book gathers together a wide range of beautiful nature illustrations from the British Library's collections, including manuscripts, prints and drawings, and rare printed books, and featuring items from all around the world. With striking

images of butterflies, beetles, spiders, animals, shells, fish and birds, the pages bring readers into contact with some of the world's most renowned natural history illustrators, such as Audubon and Catesby, and on expeditions to discover the lesser known rare finds as well. The text traces the story of the art of natural history from the Renaissance through the great age of exploration to the 19th century, to demonstrate how the collaboration between the fields of art and science has rendered such exquisite forms. The plates, all taken from books, are organized into several themed sections, though not on strict taxonomic grounds, but rather on broader themes of exotic, native, domestic, and paradoxical (with reference to what the species were at that time--for what is native now may well once have been exotic). Presents quick, easy, and inexpensive crafts using easy-to-find objects such as foil, feathers, buttons, markers, and paper streamers to create items including animals masks, career hats, and vehicles.

`Planning Educational Visits for the Early Years is full of advice on how to make visits enjoyable learning opportunities as well as great fun. This book is ideal for early years advisors, teachers and anyone planning educational visits for children aged three to seven' - Practical Pre-School `This book groups visits into five types of venue: museums, art galleries, the built environment, performing arts and zoos, aquariums and farms. For each there is a very brief rationale of why you should visit and details of a wide range of activities you can do before, during and after the visit. There are useful websites to help you find such amenities in your area. The activities will be familiar to experienced staff, but it is useful to have them all written down together' - Early Years Update 'Even experienced practitioners will find many useful ideas. I especially liked the chapter 'The Built Environment', with the idea of different 'trails' to shape local outings' - Nursery World Do you want to plan exciting, creative or cultural visits, but don't know where to start? This step-by-step guide shows you how to get the best out of trips with your young children, whether you are heading off to the zoo, visiting a farm, exploring an art gallery, going to a museum or seeing a show. Advances in Biological and Medical Physics, Volume VIII is a collection of papers that deals with chemical elements of blood, neutron activation analysis, and low level gamma-ray scintillation spectrometry. One paper describes the analysis of a large number of chemical elements in a single sample of human blood serum that includes the mean values gathered for 66 chemical elements. Another paper reviews the application of neutron activation analysis to biological and medical research, particularly in the detection and quantitation of trace elements in biological tissues. Some papers discuss the use of heavy ions in molecular and cellular radiobiology, the physics of space radiation, and carcinogenesis mechanisms. One paper discusses the radio-biological consequences of the ionizing radiation on a biological system that depends on the spatial distribution of the energy the system absorbs. The paper notes that the efficiency of heavy ions to inactivate dried enzymes kept at various constant temperatures during the exposure differs significantly from results obtained from that of sparsely ionizing

radiations. Results gathered from comparisons of model and experiments, show that indirect energy transfers, such as those made by intermediary free radicals or other secondary reaction products, can play a role in carcinogenesis. The collection can prove beneficial for biochemists, micro-biologists, cellular researchers, and academicians involved in medical physics, radiological physics, or in the study of cellular biology and oncology. Urdu for Children is the first comprehensive instructional package for teaching children Urdu as a second language. It includes a two-volume textbook, a workbook for learning the mechanics of Urdu writing, a comprehensive teacher's manual, and an audio cassette. Aimed at North American children between the ages of four and six, Urdu for Children combines traditional and whole-language instructional methods. The two-volume textbook includes forty lessons, each structured around a story or poem that reflects the theme "All About Me." This theme was chosen because children in the primary division show the greatest enthusiasm for things that relate to themselves. The methodology, outlined in the teacher's manual, was specifically designed to promote the integration of listening, speaking, reading, and writing skills; the children listen to the story or poem recorded on the audio cassette or read by the teacher, repeat it in unison, and read it from the chart. Flash cards, role-playing, and drawing are also used to reinforce vocabulary and comprehension. Developed by a team of trained school teachers with extensive backgrounds in teaching Urdu as a heritage language, Urdu for Children will help meet the needs of a rapidly growing Urdu-speaking community in North America. This bestselling

resource contains more than 50 fun and creative craft ideas. While learning about favorite Bible stories, children can make animals, wall hangings, masks, games, mobiles, and more--all using paper plates. These ideas are great for Sunday school, day school, home school, or babysitting. Get creative with Super Simple Zoo Critter Crafts! The book of Daniel is the ONLY example in the entire bible of a prophecy that was "shut up" and/or "sealed" in antiquity. This is a mysterious phrase and is the reason the book is NOT well understood to the present time. The "shutting up" or "sealing" of the book must mean that the full and complete MEANING of the prophecy would NOT be revealed to the understanding of men. That is, until the arrival of a time period called "the time of the end." (See Dan. 12:9) This appears to be the exact case because there are things in the prophecy that clearly have NOT been correctly understood to this very day. Examples of these misunderstood things in the prophecy include: (1) The meaning of the phrase, "the time of the end." (2) The historical identity of the "willful king" of Dan. 11:36. (3) The true meaning of the word "indignation" in 8:19 & 11:36. (4) The historical connection between the "sale of the land" in 11:39 AND the "willful king" of 11:36. (5) The separation of the prophecy between

ancient and modern. This approximate 1900 years time span is seen between 11:39 and 40. . The first mention of "sealing" is seen in 8:26, where the Archangel Gabriel instructs Daniel to "shut thou up the vision, for it shall be for many days." Gabriel is referring to Daniel's vision of chapter 8. It seems the "shutting up" of that vision contributes to the later "sealing" of the entire book. In 12: 4, the Archangel Gabriel instructed Daniel to "shut up the words and seal the, BOOK (even) to the time of the end." (KJV) Note: The word "even" is a supplied word as it does not appear in the original. The Septuagint (LXX) uses the word "to" instead of "even." Gabriel instructed Daniel to seal the book in 12:4, but he tells Daniel in 12:9 to-- : "Go thy way, Daniel: for the words are closed up and sealed till the time of the end." Gabriel must have assumed that Daniel had effectively "sealed" the book according to his previous instructions. The mysterious phrase "the time of the end" is mentioned 5 times in the prophecy. Some writers have said this is a short period of several decades time that will occur just before the end of human history on earth. However, one must assume from these verses that the TRUE MEANING of the prophecy would then be fully understood at or during the "time of the end." Most writers have assumed the existence of only ONE "time of the end" in the book. However, it is easily proved there are two such periods and they are parallels of each other. The first period occurred at the end of the Jewish "era." The second period will occur at the end of the Gentile "era." The present volume is a calculated attempt to "unseal" the prophecy. One reason for this idea is that the world now "lives" in the last "time of the end." After all, the prophecy states that it would be "sealed to the time of the end." The clear inference is that it would be "unsealed" at (or during) that time period. Because of a decades long, prayerful and diligent historical search, every mystery in the prophecy has now been revealed in the present volume. The prophecy can now be fully understood for the first time since the archangel Gabriel (and Daniel) "sealed" it over 2000 years ago.
