How transatlantic thinkers in the late nineteenth and early twentieth centuries promoted the unification of Britain and the United States Between the late nineteenth century and the First World War an ocean-spanning network of prominent individuals advocated the unification of Britain and the United States. They dreamt of the final consolidation of the Angloworld. Scholars, journalists, politicians, businessmen, and science

fiction writers invested the “Anglo-Saxons” with extraordinary power. The most ambitious hailed them as a people destined to bring peace and justice to the earth. More modest visions still imagined them as likely to shape the twentieth century. *Dreamworlds of Race* explores this remarkable moment in the intellectual history of racial domination, political utopianism, and world order. Focusing on a quartet of extraordinary figures—Andrew Carnegie, W. T. Stead, Cecil J. Rhodes, and H. G. Wells—Duncan Bell shows how unionists on both sides of the Atlantic reimagined citizenship, empire, patriotism, race, war, and peace in their quest to secure global supremacy. Yet even as they dreamt of an Anglo-dominated world, the unionists disagreed over the meaning of race, the legitimacy of imperialism, the nature of political belonging, and the ultimate form and purpose of unification. The racial dreamworld was an object of competing claims and fantasies. Exploring speculative fiction as well as more conventional forms of political writing, Bell reads unionist arguments as expressions of the utopianism circulating through fin-de-siècle Anglo-American culture, and juxtaposes them with pan-Africanist critiques of racial domination and late twentieth-century fictional narratives of Anglo-American empire. Tracing how intellectual elites promoted an ambitious project of political and racial unification between Britain and the United States, *Dreamworlds of Race* analyzes ideas of empire and world order that reverberate to this day.

You might think stress-free navigation sounds like an impossible paradox. But it need not be. All boaters, whether under sail or under power, need to be able to navigate safely on the water - both to keep themselves and their crew out of trouble and to avoid endangering others. Yet navigation has often been presented almost as a black art - complicated, full of tricky maths, and with alien concepts to get your head around. Step in 'Mr Stress-Free': having in his previous books presented techniques for sailing and motorboating in an accessible, manageable fashion, Duncan Wells now turns his attention to

navigation. He makes concepts easy to understand and the practice of navigation perfectly achievable for all - with minimum stress. The book covers the basic introductory elements clearly and simply for novices, and progresses through more advanced techniques for experienced navigators, so that there is something for everyone, whatever their skill level. Diagrams, quick-reference tables and flowcharts, explanatory step-by-step photographs, box features, top tips and QR codes - giving access to explanatory videos - are all features that have been much appreciated by readers of Duncan's other top-selling titles. Historically organized, the text presents a series of responses to the title question from Plato, Aristotle, thinkers in Christianity, Aquinas, Hobbes, Hume, Kant, Mill, Nietzsche, and several twentieth century philosophers. Duncan Richter explains each philosophers thoughts on ethics, virtue, and character and discusses ensuing objections to each philosophers arguments. Quince Duncan is a comprehensive study of the published short stories and novels of Costa Rica's first novelist of African descent and one of the nation's most esteemed contemporary writers. The grandson of Jamaican and Barbadian immigrants to Limón, Quince Duncan (b. 1940) incorporates personal memories into stories about first generation Afro-West Indian immigrants and their descendants in Costa Rica. Duncan's novels, short stories, recombinations of oral literature, and essays intimately convey the challenges of Afro-West Indian contract laborers and the struggles of their descendants to be recognized as citizens of the nation they helped bring into modernity. Through his storytelling, Duncan has become an important literary and cultural presence in a country that forged its national identity around the leyenda blanca (white legend) of a rural democracy established by a homogeneous group of white, Catholic, and Spanish peasants. By presenting legends and stories of Limón Province as well as discussing the complex issues of identity, citizenship, belonging, and cultural exile, Duncan has written the story of West Indian migration into the official literary discourse of Costa Rica. His novels *Hombres curtidos* (1970) and *Los cuatro espejos* (1973) in particular portray the Afro-West Indian community in Limón and the cultural intolerance encountered by those of African-Caribbean descent who migrated to San José. Because his work follows the historical trajectory from the first West Indian laborers to the contemporary concerns of Afro-Costa Rican

people, Duncan is as much a cultural critic and sociologist as he is a novelist. In Quince Duncan, Dorothy E. Mosby combines biographical information on Duncan with geographic and cultural context for the analysis of his works, along with plot summaries and thematic discussions particularly helpful to readers new to Duncan. Profoundly original yet insistent on the derivative quality of his work, transgressive yet affirmative of tradition, Robert Duncan (1919-1988) was a generative force among American poets, and his poetry and poetics establish him as a major figure in mid- and late- 20th-century American letters. This second volume of Robert Duncan's collected poetry and plays presents authoritative annotated texts of both collected and uncollected work from his middle and late writing years (1958-1988), with commentaries on each of the five books from this period: *The Opening of the Field*, *Roots and Branches*, *Bending the Bow*, and the two volumes of

Ground Work. The biographical and critical introduction discusses Duncan as a late Romantic and postmodern American writer; his formulation of a homosexual poetics; his development of the serial poem; the notation and centrality of sound as organizing principle; his relations with such fellow poets as Robin Blaser, Charles Olson, and Jack Spicer; his indebtedness to Alfred North Whitehead; and his collaborations with the painter Jess Collins, his lifelong partner. Texts include his anti-war poems of the 1960s and 70s, his homages to Dante and other canonical poets, and his translations from the French of Gérard de Nerval, as well as the complete *Structure of Rime* and *Passages* series.
