[Plant-Soil Interactions at Low pH](#) Sep 30 2022 Soil acidity is a major limitation to crop production in many parts of the world. Plant growth inhibition results from a combination of factors, including aluminum, manganese, and hydrogen ion toxicities and deficiencies of essential elements, particularly calcium, magnesium, phosphorus, and molybdenum. Agricultural management practices and acid precipitation have increased acid inputs into the ecosystem and heightened concern about soil acidity problems. While application of lime has proved to be effective in ameliorating surface soil acidity in many areas, significant soil acidity problems still exist. Scientists from Alberta, Canada, recognized the need to provide a forum for researchers from different disciplines to exchange information and ideas on solving problems of plant growth in acid soils. As a result of their efforts, the First International Symposium on Plant-Soil Interactions at Low pH was held at Grande Prairie, Alberta, Canada, in July 1987. In many acid soil areas, liming materials are not readily available, the cost may be prohibitive, or subsoil acidity cannot be corrected by surface application of lime. New management approaches involving both the plant and the soil are needed in these situations. Progress has been made in the selection and breeding of acid-tolerant plants. However, continued progress will be limited by our lack of understanding of the physiological and biochemical basis of differential acidity tolerance among plants.

[Computerworld](#) Sep 06 2020 For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

[Proceedings of the International Field Exploration and Development Conference 2021](#) Jan 23 2022 This book focuses on reservoir surveillance and management, reservoir evaluation and dynamic description, reservoir production stimulation and EOR, ultra-tight reservoir, unconventional oil and gas resources technology, oil and gas well production testing, and geomechanics. This book is a compilation of selected papers from the 11th International Field Exploration and Development Conference (IFEDC 2021). The conference not only provides a platform to exchanges experience, but also promotes the development of scientific research in oil & gas exploration and

production. The main audience for the work includes reservoir engineer, geological engineer, enterprise managers, senior engineers as well as professional students.

The Chemical Investigation of Recent Lake Sediments from Wisconsin Lakes and Their Interpretation Jul 05 2020 To trace the effects of cultural eutrophication, one meter sediment cores were used to determine the history of calcareous and noncalcareous Wisconsin lakes. Cores were analyzed for carbon, phosphorus, calcium, magnesium, potassium, aluminum, iron, and manganese. Determinations of organic nitrogen, exchangeable ammonium and acid soluble phosphorus were made on selected sedimentary profiles. Recent sedimentation rates and identification of pre- and postcultural sediments were determined by ragweed pollen. Enrichment of phosphorus in postcultural Lake Mendota, Wisconsin, sediments are the effect of increased phosphorus supply from domestic sewage. Chemical stratigraphy of concentration-depth diagrams permit a qualitative evaluation of cultural activities. Potentialities and limitations of using recent lake sediments to evaluate eutrophication are discussed.

Assisted History Matching for Unconventional Reservoirs Jun 27 2022 As unconventional reservoir activity grows in demand, reservoir engineers relying on history matching are challenged with this time-consuming task in order to characterize hydraulic fracture and reservoir properties, which are expensive and difficult to obtain. Assisted History Matching for Unconventional Reservoirs delivers a critical tool for today's engineers proposing an Assisted History Matching (AHM) workflow. The AHM workflow has benefits of quantifying uncertainty without bias or being trapped in any local minima and this reference helps the engineer integrate an efficient and non-intrusive model for fractures that work with any commercial simulator. Additional benefits include various applications of field case studies such as the Marcellus shale play and visuals on the advantages and disadvantages of alternative models. Rounding out with additional references for deeper learning, Assisted History Matching for Unconventional Reservoirs gives reservoir engineers a holistic view on how to model today's fractures and unconventional reservoirs. Provides understanding on simulations for hydraulic fractures, natural fractures, and shale reservoirs using embedded discrete fracture model (EDFM) Reviews automatic and assisted history matching algorithms including visuals on advantages and limitations of each model Captures data on uncertainties of fractures and reservoir properties for better probabilistic production forecasting and well placement

Energy Research Abstracts Nov 01 2022

The Biochar Solution Apr 25 2022 How the dirt below our feet can save us from extinction. Conventional agriculture destroys our soils, pollutes our water and is a major contributor to climate change. What if our agricultural practices could stabilize, or even reverse these trends? The Biochar Solution explores the dual function of biochar as a carbon-negative energy source and a potent soil-builder. Created by burning biomass in the absence of oxygen, this material has the unique ability to hold carbon back from the atmosphere while simultaneously enhancing soil fertility. Author Albert Bates traces the evolution of this extraordinary substance from the ancient black soils of the Amazon to its reappearance as a modern carbon sequestration strategy. Combining practical techniques for the production and use of biochar with an overview of the development and future of carbon farming, The Biochar Solution describes how a new agricultural revolution can reduce net greenhouse gas emissions to below zero while increasing world food reserves and creating energy from biomass wastes. Biochar and carbon farming can: Reduce fossil fuels inputs into our food system Bring new life to desert landscapes Filter and purify drinking water Help build carbon-negative homes, communities and nations. Biochar is not without dangers if unregulated, and it is not a panacea, but if it fulfills its promise of taking us back from the brink of irreversible climate change, it may well be the most important discovery in human history.

Global Problems, Smart Solutions Apr 06 2023 A high profile thought experiment asks leading scholars to make cases for spending additional aid money to combat major world problems.

The Nonprofit Manager's Resource Directory Mar 25 2022 A newly revised and updated edition of the ultimate resource for nonprofit managers If you're a nonprofit manager, you probably spend a good deal of your time tracking down hard-to-find answers to complicated questions. The Nonprofit Manager's Resource Directory, Second Edition provides instant answers to all your questions concerning nonprofit-oriented product and service providers, Internet sites, funding sources, publications, support and advocacy groups, and much more. If you need help finding volunteers, understanding new legislation, or writing grant proposals, help has arrived. This new, updated edition features expanded coverage of important issues and even more answers to all your nonprofit questions. Revised to keep vital information up to the minute, The Nonprofit Manager's Resource Directory, Second Edition: * Contains more than 2,000 detailed listings of both nonprofit and for-profit resources, products, and services * Supplies complete details on everything from assistance and support groups to software vendors and Internet servers, management consultants to list marketers * Provides information on all kinds of free and low-cost products available to nonprofits * Features an entirely new section on international issues * Plus: 10 bonus sections available only on

CD-ROM The Nonprofit Manager's Resource Directory, Second Edition has the information you need to keep your nonprofit alive and well in these challenging times. Topics include: * Accountability and Ethics * Assessment and Evaluation * Financial Management * General Management * Governance * Human Resource Management * Information Technology * International Third Sector * Leadership * Legal Issues * Marketing and Communications * Nonprofit Sector Overview * Organizational Dynamics and Design * Philanthropy * Professional Development * Resource Development * Social Entrepreneurship * Strategic Planning * Volunteerism

Miombo Woodlands in a Changing Environment: Securing the Resilience and Sustainability of People and Woodlands Mar 05 2023 Based on work by the Miombo Network in southern Africa, this book helps decision-makers and general readers alike improve their understanding of the socio-ecology of the Miombo woodlands across southern Africa. It also highlights the importance of and the need for further research on the unique Miombo ecology and its link with economic development. One major challenge facing these woodlands is the influence that direct (both natural and anthropogenic) and indirect drivers of change, as well as interactions between these, have had over the centuries. As such the book explores the socio-economic and ecological interactions that occur in these woodlands and discusses the need for further research to provide a better understanding of these interactions. Drawing on data and information from numerous studies conducted in the last 20 years, the book presents a comparative analysis of policy changes and management experiences in the countries concerned. It also addresses issues of global climate change, since they have an impact on Miombo ecosystem management and restoration, and provides future projections based on an assessment of how climate change has affected the Miombo woodlands in the past.

The Solution of a Remarkable Case Sep 18 2021 "Eugenie La Verde was lying upon her bed, clad in the soft wrapper which the maid had helped her to don before leaving her on the preceding night. Her face was distorted and swollen almost beyond recognition, and in spots was highly discolored, where the blood had coagulated beneath the skin. Her mouth was open, and her eyes were wide and staring, even yet filled with an expression of the horror through which she had passed just before her death. Her delicate hands, pretty enough for an artist's model, were clenched until the finger-nails had sunk into the tender flesh and drawn blood. The figure bore every evidence of a wild and terrific struggle to escape from the grasp in which she had been seized, while the dull blue mark around her throat told only too plainly how her death had been accomplished." (Excerpt) Nick Carter is a famous private detective, a fictional character invented by John R. Coryell and Ormond G. Smith. This private detective from thriller classics has appeared in a variety of formats over more than a century. His father, Sin Carter, was also a detective and he taught young Nick some investigation techniques from early ages. After his father's death during one case, Nick takes over the investigation and continues to work as a detective. A master of disguise, Nick Carter spends most of the time under cover and keeps a low profile, based in an apartment on Madison Avenue in New York.

Rheology Jun 15 2021 This book contains a wealth of useful information on current rheology research. By covering a broad variety of rheology-related topics, this e-book is addressed to a wide spectrum of academic and applied researchers and scientists but it could also prove useful to industry specialists. The subject areas include, polymer gels, food rheology, drilling fluids and liquid crystals among others.

The Only Permanent Solution to All Human Problems is the Rational God May 15 2021 You need not label you. Even if you did, that is fine. You may come in any hue or color-Christian, Muslim, atheist, liberal, conservative, Marxist, black, white, man, woman, homosexual, American, African, CEO, homeless, geek, dunce or any identity. The bottom line is you are a human being. You cannot escape that truth. You cannot bury the inviolable equality that truth brings. Once you are a human being you are an intelligent being. Once you are an intelligent being you have to face and explore the truth of life, including the existence or nonexistence of God. The religious, the atheists, the scientists and the entire world can argue whatever they want. Their arguments do not affect the truth of your existence. You cannot slip into that mess because the world doesn't live your life; only you live your life. If God is true, He or She cannot be limited to the belief of the religious. God must be accessible to the intelligent human being as well. So come on, let us explore God rationally.

Dynamic Properties of Forest Ecosystems Dec 22 2021 This volume brings together different 'schools' of ecological investigation of woodlands. After a description of the structure and floristic composition of the research sites, involving a comparison of boreal, temperate, Mediterranean and tropical forest, the study goes on to consider the dynamic aspects of the woodland formation.

Properties of Nanostructured Hydroxyapatite Prepared by a Spray Drying Technique Jul 17 2021

Married Love: A New Contribution to the Solution of Sex Difficulties Apr 13 2021 Dr. Marie Carmichael Stopes in this book discusses subjects that surround sexual difficulties and ideas that people consider sacred in society. The author covers subjects including The Heart's Desires, The Broken Joy, Woman's "Contrariness", Modesty and Romance, and other sacred subjects in relationships. She relates these subjects to our lives and how their influence our relationships and interactions within society.

Landscape Performance May 03 2020 Ian McHarg's ecological planning approach has been influential since the

20th century. However, few empirical studies have been conducted to evaluate the performance of his projects. Using the framework of landscape performance assessment, this book demonstrates the long-term benefits of a renowned McHargian project (The Woodlands town development) through quantitative and qualitative methods. Including 44 black and white illustrations, Landscape Performance systematically documents the performance benefits of the environmental, social, and economic aspects of The Woodlands project. It delves into McHarg's planning success in The Woodlands in comparison with adjacent Houston developments, which demonstrated urban resilience after Hurricane Harvey in 2017. Lastly, it identifies the ingredients of McHarg's ability to do real and permanent good. Yang also includes a number of appendices which provide valuable information on the methods of assessing performance in landscape development. This book would be beneficial to academics and students of landscape architecture and planning with a particular interest in Ian McHarg.

Environmental Law and Policy in India Dec 10 2020 Environmental law and policy in India affects all sections of society. Those most deeply affected by it are the poor. They are the first victims of poor sanitation, polluted air, and contaminated water. Since the 1970s, efforts to protect environmental quality have met with limited success, posing enduring challenges for policy designers and decision-makers entrusted with protecting and preserving natural resources. This edition of Environmental Law and Policy retains the familiar analytical structure of the second edition and includes all major developments since then. It focuses on Indian environmental law, policies, problems, and needs with the comprehensiveness of an American law case book, compiles all the leading cases in environmental law in India with concise extracts of landmark judgments and policy documents, and provides discussions on projects which could potentially degrade the environment. This volume also covers air and water pollution, forests, wildlife, noise pollution, common property resources and tribal communities, environmental impact assessment, coastal regulations, large projects, urban problems, the National Green Tribunal, hazardous substances, transnational environmental policies, and international environment law. It is interlaced with notes, comments, and questions intended to encourage critical thinking amongst lawyers and law students.

Scaling up Nature-based Solutions to Tackle Water-related Climate Risks Insights from Mexico and the United Kingdom May 07 2023 This report provides an assessment of the use of, and recommendations for scaling up, Nature-based Solutions to address water-related climate risks.

OUR FRAGILE WORLD: Challenges and Opportunities for Sustainable Development - Volume II Mar 13

2021 This publication, Our Fragile World: Challenges and Opportunities for Sustainable Development presents perspectives of several important subjects that are covered in greater detail and depth in the Encyclopedia of Life Support Systems (EOLSS). The contributions to the two volumes provide an integrated presentation of knowledge and worldviews related to the state of: Earth's natural resources, social resources, institutional resources, and economic and financial resources. They present the vision and thinking of over 200 authors in support of efforts to solve the complex problems connected with sustainable development, and to secure perennial life support on "The Blue Planet". These contributions are holistic, informative, forward looking, and will be of interest to a broad readership. This volume presents contributions with focus on the Economic and Institutional Dimensions of Sustainable Development in two sections: KNOWLEDGE, TECHNOLOGY, AND MANAGEMENT (Knowledge; Technology and Management ; Economics; Finance and trade). – POLICY AND INSTITUTIONAL IMPLICATIONS FOR SUSTAINABLE DEVELOPMENT (Policy Issues; Institutional implications; Regional Analysis).

Event Solutions Feb 09 2021

Felder's Comprehensive, 2005 Edition Oct 08 2020 Every industry has its standard professional directory -- advertising has its Black Book, manufacturing its Thomas's Register -- except, that is, for architecture...and design...and construction. While there are dozens of smaller directories, each addressing a specific market niche, none speak to all three industries in a comprehensive way. And larger product directories, like Sweets, are advertising driven and therefore incomplete. Felder's Comprehensive is the first pan-industry guide of its kind, and it is many times more comprehensive than the nearest competitor. It is an annual desk reference, directory, and product source guide with more reference information than any other title currently available. It contains thousands of listings of time-sensitive and timeless reference information for anyone involved in the business or practice of architecture, design, design/build, construction, interior design, facility management, and real-estate development. For example, readers can find listings for more than 12,000 manufacturers of furnishings, fixtures, equipment, and materials listed alphabetically, and, most importantly, by product category. Felder's also lists design competitions, domestic and international trade shows, trade publications and other media, trade associations, professional

organizations, and more. Most sections are indexed and cross-referenced for easy referral and identification. Felder's is the first truly comprehensive reference guide of its kind for the A/E/C marketplace and is certain to become the industry standard.

Cell Electrophoresis Oct 20 2021 This book presents a summary of the application and instrumentation of cell electrophoresis. The method of making cell purification and characterization possible according to the cellular negative surface charge density is discussed, and ideas for future developments are explained. The negative electrostatic forces at cell surfaces provide information about cell-cell interaction, blood vessel sealing, cytokine actions, cell transformation, ion transport phenomena, and other biological phenomena. Recalculations of the physical principles of cell electrophoresis reveal possibilities for removing disruptive factors caused by electrical current, heat, and sedimentation. The introduction of computer technology, the performance of simultaneous two-parameter measurements, and the application of cell-friendly but current-inert buffer systems render the method more reliable and efficient.

Advanced Manufacturing Processes III Feb 21 2022 This book offers a timely snapshot of innovative research and developments at the interface between manufacturing, materials and mechanical engineering, and quality assurance. It covers a wide range of manufacturing processes, such as grinding, boring, milling, turning, woodworking, coatings, including additive manufacturing. It focuses on laser, ultrasonic, and combined laser-ultrasonic hardening treatments, and dispersion hardening. It describes tribology and functional analysis of coatings, separation, purification and filtration processes, as well as ecological recirculation and electrohydraulic activation, highlighting the growing role of digital twins, optimization and lifecycle management methods, and quality inspection processes. It also covers cutting-edge heat and mass transfer technologies and energy management methods. Gathering the best papers presented at the 3rd Grabchenko's International Conference on Advanced Manufacturing Processes (InterPartner-2021), held in Odessa, Ukraine, on September 7–10, 2021, this book offers a timely overview and extensive information on trends and technologies in manufacturing, mechanical, and materials engineering, and quality assurance. It is also intended to facilitate communication and collaboration between different groups working on similar topics and to offer a bridge between academic and industrial researchers.

Recent Trends in Phosphate Mining and Beneficiation and Related Waste Management Aug 06 2020 The extraction of apatite minerals is becoming more and more crucial with the depletion of high-grade ores. At the same time, many streams of waste are continuously being produced by the phosphate industry, including calcareous and siliceous waste rocks, clayey sludge and phosphogypsum. These waste products are produced in huge volumes reaching a ratio of between 5 to 10 tons of waste per each ton of concentrated phosphate. The management of these waste products is becoming a real issue in terms of growing public awareness and environmental and financial aspects. In addition, phosphate ores are known to contain other critical raw materials (CRM) such as rare earth elements and uranium. The recovery of these vital elements from phosphate waste may help to develop the needs of the green energy of the future and contribute to the achievement of the sustainable development goals. In this Special Issue, insights related to the following aspects were studied: phosphate extraction and beneficiation, novel phosphate ores, the fine characterization of phosphate ores and waste, phosphoric acid production, critical raw material (CRM) recovery from phosphate ores and waste, reprocessing of phosphate wastes and finally the valorization and reuse of phosphate waste and phosphogypsum.

The Real Options Solution May 27 2022 Harness the power of real options Real options theory is based on the Nobel Prize-winning work on financial options, and has captured the interest of executives, managers, and investors who need to understand the future profitability of an asset. Originally developed to value technology initiatives and companies, the method is now being applied broadly across various businesses and industries. The Real Options Solution offers comprehensive coverage of the real options approach with a five-step framework and examples for applying the author's unique total value model based on real options analysis. This approach will help executives and investors minimize the risk of committing to new ventures and delivers a framework flexible enough to apply to business initiatives in all types of companies.
